## A Golden Opportunity

Dynamic Active Global Gold ETF invests in equity securities of gold companies based anywhere in the world that are engaged in the production, development and exploration of gold deposits.

- Gold has historically been viewed as a hedge against inflation and a safe haven asset in times of economic and geopolitical stress.
- Gold equities provide additional opportunity above and beyond owning gold bullion through the discovery and production of gold.
- Provides exposure to high quality gold companies run by seasoned management teams with track records of successfully delivering value for shareholders and with strong technical mining backgrounds.
- Leverage the combined investment and technical knowledge of Dynamic's Metals & Mining team, which includes over 60 years of combined industry experience and covers the three main facets of mining: geology, mining process engineering and metallurgy.
