## Mining Alpha

Dynamic Active Mining Opportunities ETF invests in global equity securities of companies engaged in the exploration, development and production of metals and minerals, including but not limited to precious metals, industrial metals and critical minerals.

- Metals and minerals have always been an integral input for continued economic growth. However, supply shortfalls are expected in the coming years and decades after a prolonged period of underinvestment in exploration and development.
- Invest in a diversified and actively managed portfolio of mining companies across various stages of the mining lifecycle.
- Leverage the combined investment and technical knowledge of Dynamic's Metals & Mining team, which includes over 60 years of combined industry experience and covers the three main facets of mining: geology, mining process engineering and metallurgy.
