

DynamicEdge Portfolios

Designed for investors.

One smart move for your secure financial future

You may not think about investing every day, but you probably think about your future. Whether it's retiring comfortably or protecting what you've built, your goals matter.

That's where DynamicEdge Portfolios come in.

They're built for investors who care more about results than the day-to-day details. In just a few simple steps and with the help of your Financial Adviser, you can make a single, powerful investment designed to help you reach your goals.

Best of all, you'll have confidence knowing your portfolio is tailored to you, actively monitored, and managed by top-tier professionals who keep it on track.

The foundation for successful investing

Diversification

A well-constructed investment portfolio starts with diversification—allocating your money across a mix of stocks, bonds, and alternative assets (such as real estate and infrastructure). This approach helps manage risk and reduce volatility, providing a steadier path toward achieving your financial goals.

Among large-, medium- and small-sized companies

Within different industries

Multilayered diversification

DynamicEdge Portfolios go beyond traditional diversification by investing not only across asset classes like stocks, bonds, and alternatives, but also spreading the portfolio in other ways:

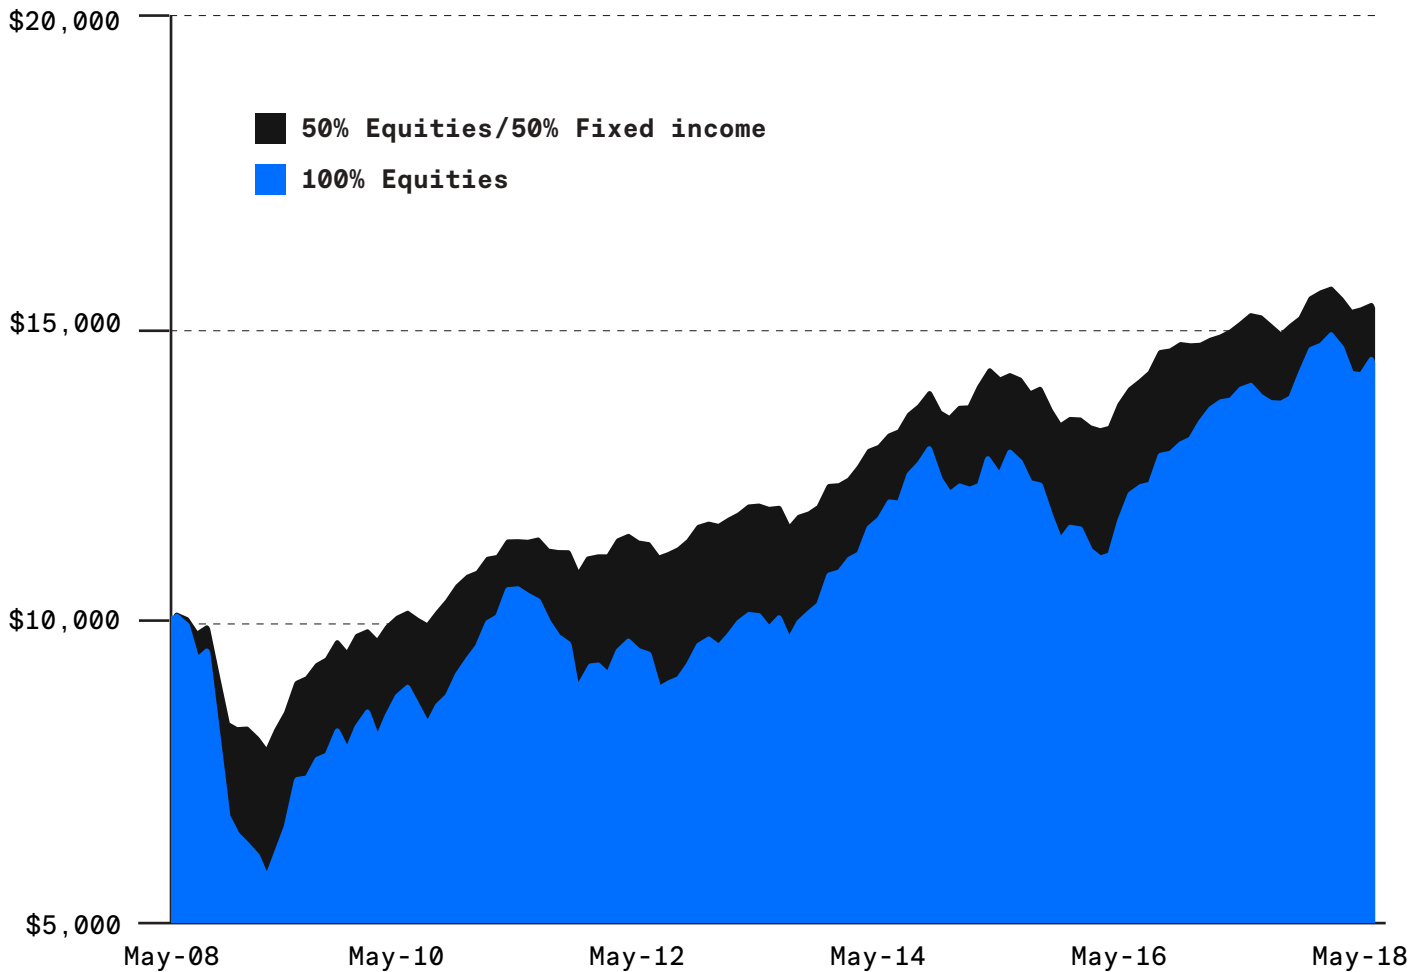

Across geographic regions

By managers with complementary investment styles

A smoother, more rewarding ride

Source: Morningstar Research Inc., 100% equities is represented by the S&P/TSX Composite Index; 50% equities/50% fixed income is represented by 50% S&P/TSX Composite Index and 50% FTSE Canada Universe Bond Index. For illustrative purposes only.

Your retirement or pre-retirement cash flow

DynamicEdge Portfolios allow you to receive tax-efficient cash flow from your investments. You can work with your Adviser to customize the withdrawal amounts.

A portfolio that's right for you

DynamicEdge Portfolios

DynamicEdge Portfolios bring together a mix of investment funds into six distinct portfolios, each with a distinct asset allocation. Some have more stocks (equities); some have more bonds (fixed income). Portfolios with a higher percentage of equities are considered more aggressive while those with a greater proportion of fixed income are considered more conservative. There's a DynamicEdge Portfolio that's right for your investment goals.

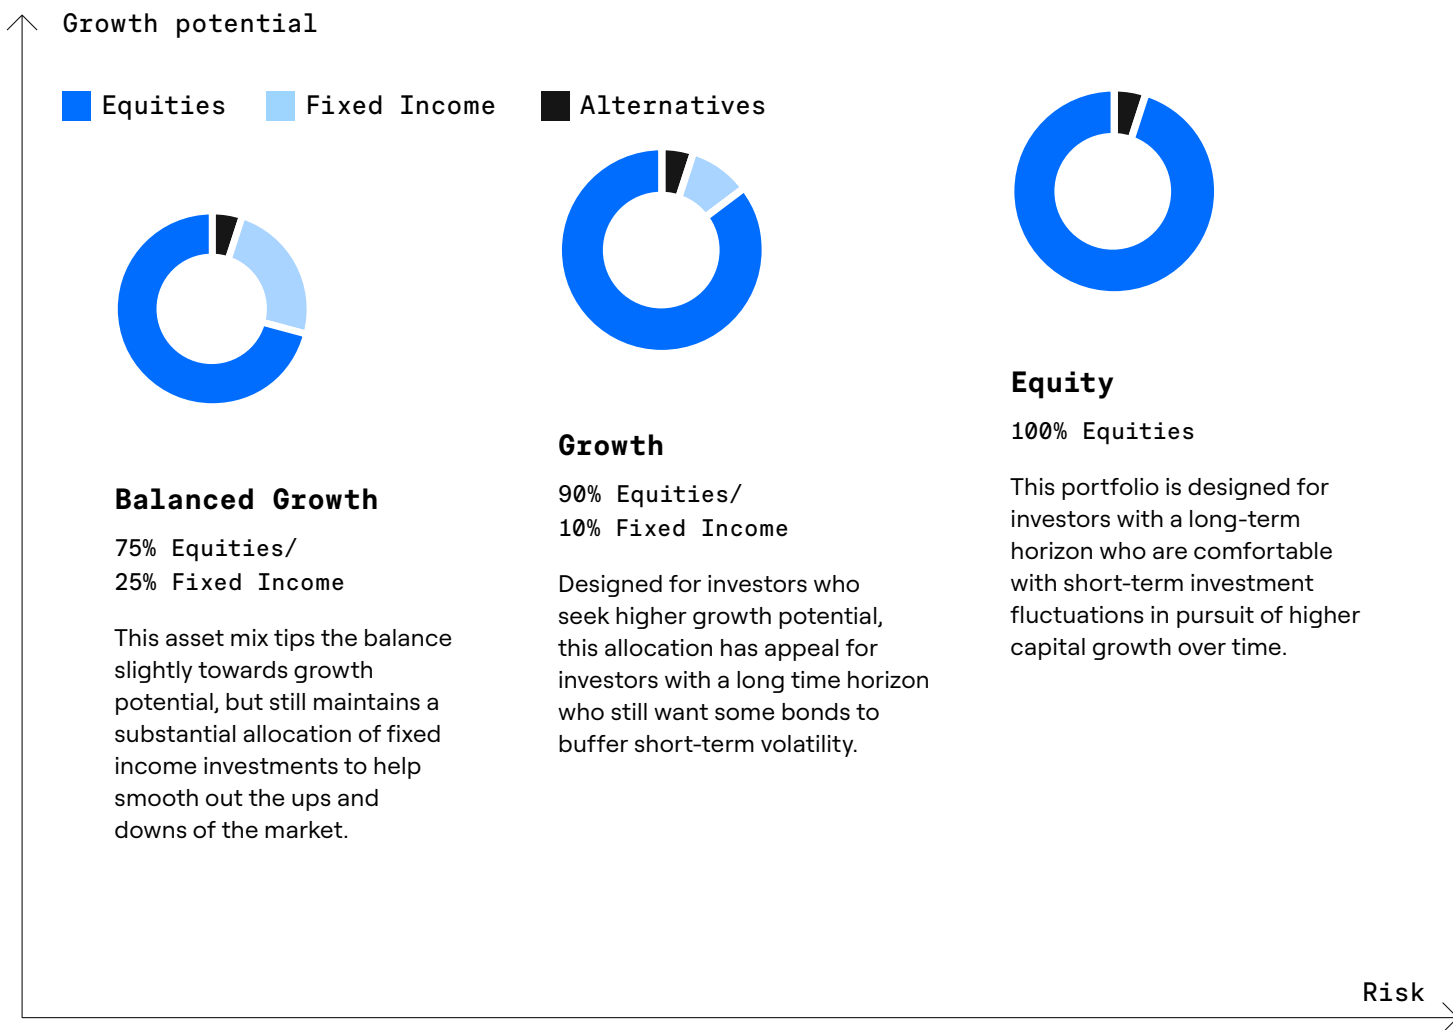

All portfolios include a 5% allocation to alternative investments. In more conservative portfolios, this allocation is primarily directed toward fixed income alternatives, while in the equity dominant portfolios, it is weighted more heavily toward equity alternatives.

Simple outside, smart inside

DynamicEdge Portfolios are designed to maintain a consistent investment strategy over time. Using daily cash flows, we will maintain your allocations close to target.

In addition, DynamicEdge Portfolios are overseen by the Oversight Committee. This highly experienced team of investment professionals will conduct periodical assessments to make sure your investments remain on track.

Getting started

An investment manager you can trust

DynamicEdge Portfolios are exclusively managed by Dynamic Funds, an investment management company with over 50 years of experience. Dynamic managers seek to add value through an active management approach that's defined by independent thinking and strong conviction.
