**How risky is it?**

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**Risk rating**

1832 Asset Management L.P. has rated this Fund's risk to be **high**.

This rating considers how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the Risk section of the Fund's simplified prospectus.

**No guarantees**

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

**How has the Fund performed?**

This section tells you how the Series IP shares of the Fund have performed over the past 10 calendar years. Returns are after expenses have been deducted. These expenses reduce the Fund's returns.

**Year-by-year returns**

This chart shows how the Series IP shares of the Fund have performed in each of the past 10 calendar years. The Fund dropped in value in 2 of the past 10 calendar years. The range of returns and change from year to year can help you assess how risky the Fund has been in the past. It does not tell you how the Fund will perform in the future.

**Best and worst 3-month returns**

This table shows the best and worst returns for the Series IP shares of the Fund in a 3-month period over the past 10 years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	43.1%	June 30, 2020	Your investment would rise to \$1,431
Worst return	(34.6)%	March 31, 2020	Your investment would drop to \$654

**Average return**

A person who invested \$1,000 in Series IP shares of the Fund ten years ago now has \$2,463. This works out to be an annual compound return of 9.4%.

**Who is this Fund for?**

**Investors who are ...**

- seeking the potential for long term capital growth through exposure primarily to equity securities of companies operating in the resource sector;
- able to accept some variability of returns and are investing for the medium to long term.

Series IP shares are intended for investors making large investments in a Fund.

**I** Do not invest in this Fund if you cannot accept the volatility of resource prices and their potential impact on equity markets in this sector.

**A word about tax**

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

A switch to a different fund within the same mutual fund corporation or a reclassification between series of the same fund that employ different hedging strategies will result in a disposition for tax purposes and accordingly, you will realize a capital gain or capital loss.

**How much does it cost?**

The following tables show the fees and expenses you could pay to buy, own and sell Series IP shares of the Fund. The fees and expenses, including any commissions, can vary among series of the Fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

**1. Sales charges**

No sales charges are applicable to the Series IP shares of the Fund.

**2. Fund expenses**

You don't pay these expenses directly. They affect you because they reduce the returns of the Series IP shares of the Fund.
