**How risky is it?**

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**Risk rating**

This rating considers how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the Risk section of the Fund's simplified prospectus.

**No guarantees**

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

### Who is this Fund for?

#### Investors who are ...

- seeking interest income and protection against the effects of interest rate fluctuations by investing primarily in North American investment grade corporate bonds and entering into interest rate swaps to deliver a floating rate of income;
- able to accept some variability of returns and are investing for the short to medium term.

Series FH units are intended for investors participating in an eligible fee-based or wrap program with their representative's firm, and purchasing in U.S. dollars and seeking a hedge against changes in the U.S. currency relative to the Canadian currency.

**!** Do not invest in this Fund if you are seeking aggressive growth of capital through an equities only investment strategy.

### A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

A reclassification between series of the same fund that employ different hedging strategies may result in a disposition for tax purposes and accordingly, you may realize a capital gain or capital loss.
