

Dynamic Global Growth Opportunities Fund

Annual Management Report of Fund Performance

For the period ended June 30, 2024

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling toll-free 1-800-268-8186, by writing to us at 40 Temperance Street, 16th Floor, Toronto, ON, M5H 0B4 or by visiting our website at www.dynamic.ca or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's interim financial statements, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

1832 Asset Management L.P. is the manager (the "Manager") of the fund. In this document, "we", "us", "our" and the "Manager" refer to 1832 Asset Management L.P. and the "Fund" refers to Dynamic Global Growth Opportunities Fund.

The term "net asset value" or "net asset value per unit" in this document refers to the net asset value determined in accordance with Part 14 of National Instrument 81-106 – Investment Fund Continuous Disclosure ("National Instrument 81-106"); while the term "net assets" or "net assets per unit" refers to total equity or net assets attributable to unitholders of the Fund as determined in accordance with IFRS Accounting Standards.

Caution Regarding Forward-Looking Statements

Certain portions of this report, including, but not limited to, "Recent Developments", may contain forward-looking statements about the Fund and the underlying funds, as applicable, including statements with respect to strategies, risks, expected performance events and conditions. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "projects" and similar forward-looking expressions or negative versions thereof.

In addition, any statement that may be made concerning future performance, strategies or prospects and possible future action by the Fund is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future general economic, political and relevant market factors, such as interest rates, foreign exchange rates, equity and capital markets, and the general business environment, in each case assuming no changes to applicable tax or other laws or government regulation. Expectations and projections about future events are inherently subject to, among other things, risks and uncertainties, some of which may be unforeseeable. Accordingly, current assumptions concerning future economic and other factors may prove to be incorrect at a future date.

Forward-looking statements are not guarantees of future performance and actual results or events could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, such as interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government relations, unexpected judicial or regulatory proceedings and catastrophic events. We stress that the above mentioned list of important factors is not exhaustive. Some of these risks, uncertainties and other factors are described in the Fund's simplified prospectus, under the heading "Risk Factors".

We encourage you to consider these and other factors carefully before making any investment decisions. Forward-looking statements should not be unduly relied upon. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next management report of fund performance, and that the forward-looking statements speak only to the date of this management report of fund performance.

Investment Objective and Strategies

The Fund seeks to provide attractive long-term equity or equity related returns.

The Fund will use alternative investment strategies primarily including engaging in physical short sales and may also include purchasing securities on margin or with borrowed funds.

All of the Fund's objectives and strategies are further described in the simplified prospectus of the Fund.

Risk

The risks associated with investing in the Fund are as described in the simplified prospectus. There were no material changes to the Fund over its last completed financial year that affected the overall level of risk of the Fund.

Results of Operations

For the year ended at June 30, 2024 (the "period"), the Series A units of the Fund generated a total return of -4.5%. Fund returns are reported net of all management fees and expenses for all series, unlike the returns of the Fund's benchmark, which is based on the performance of an index that does not pay fees or incur expenses. Returns for other series of the Fund will be similar to Series A with any difference in performance being primarily due to

different management fees, operating expenses and other expenses that are applicable to that particular series. Please see the “Past Performance” section for the performance of the Fund’s other series.

The Fund’s broad-based benchmark, the Morningstar Global Markets Small-Mid Cap (C\$), returned 15.4% during the same period. In accordance with National Instrument 81-106, we have included a comparison to this broad-based index to help you understand the Fund’s performance relative to the general performance of the market.

When the Fund makes investments in derivatives, borrows cash for investment purposes, or uses physical short sales on equities, fixed income securities or other portfolio assets, leverage may be introduced into the Fund. Leverage is measured by calculating the sum of the following: (i) the aggregate market value of the Fund’s indebtedness; (ii) the aggregate market value of securities sold short by the Fund; and (iii) the aggregate notional value of the Fund’s specified derivatives positions excluding any specified derivatives used for hedging purposes.

During the period, the Fund’s aggregate exposure to these strategies ranged from 8% to 16%.

The Fund is a performance oriented, liquid alternative fund. It invests primarily in U.S. and global equities and will at times, use short positions for alpha purposes.

At the end of the period, the Fund was primarily comprised of companies from the Information Technology, Consumer Discretionary, Health Care and Industrials sectors. The Fund underperformed the benchmark during the period. Stock selection in the Health Care and Financials sectors were the primary detractors from performance while stock selection in the Consumer Discretionary and Information Technology sectors were key contributors to performance.

Global equities advanced over the 12-month period as the MSCI World Index (C\$) returned 24.2%. As we witnessed equity markets generate double-digits returns, inflation has declined and the global economy has remained stagnant (slow growth). This has put the spotlight on central banks on the likelihood and extent of interest rates cuts.

The Bank of Canada (BoC) was the first Group of Seven central bank to offer rate relief with a 25 basis point interest rate cut. This was soon followed by the European Central Bank (ECB) with also a 25 basis point cut. Both central banks indicated additional reductions were possible even though inflation remains above their targets because they expect inflation to keep declining.

The U.S. Federal Reserve (Fed) has taken a wait and see approach on reducing interest rates. The basis for this stance is that inflation remains stubbornly above the Fed’s 2% target inflation rate. As of May, the inflation rate came in at 3.3%. The Fed is trying to balance the risk of cutting rates too soon and allowing inflation to persist. Fed Chair Powell mentioned they can take their time to cut interest rates so long as the labor market stays healthy.

Ironically, the Bank of Japan raised interest rates from –0.1% to +0.1%, ending the eight-year era of negative interest rates. The

Japanese economy, which faced deflationary pressures for a prolong period, now see indications of healthy inflation in recent months.

This high interest environment has been able to tame inflation but resulted in stagnant economic growth in most regions around the world. In the second half of the year, we are likely to see central banks take more decisive steps in cutting interest rate cuts to avoid an economic contraction.

Ten of the 11 GICS (Global Industry Classification Standard) sectors posted positive returns over the 12-month period, with Information Technology, Communication Services and Financials being the largest contributors to index returns. The worst performing sectors were Real Estate, Consumer Staples and Utilities.

The stock market of the past 12 months hasn’t fully rewarded the new leadership of growth stocks but instead the slower single digit plodders in the mega cap technology space. During the period, the Magnificent Seven stocks (Nvidia, Microsoft Corporation, Amazon.com, Inc., Meta Platforms Inc., Alphabet, Inc., Apple, Inc. and Tesla), contributed nearly 40% of the return of the MSCI World (C\$) index and that is with Tesla detracting approximately 32 bps from the return. Perhaps a preference for buybacks, operating leverage and underweighting in the sector is to blame. Yes, some of the mega cap stock moves were justified, as several of these companies have had positive inflections in their businesses, but many of the past year’s leaders simply didn’t meet our growth thresholds that have we followed for the past 30 years; however; we believe a major inflection point has arrived.

After laying people off and cutting costs, the mega-cap technology companies are embarking on a massive AI related capital expenditure plan. Microsoft alone will spend well over \$40 billion dollars over the near term on AI datacentres and infrastructure. \$40 billion is a larger dollar amount than 80% of the companies in the S&P 500 have in annual revenue. Many of these mega-cap names have been trading off the tremendous operating leverage they’ve seen through cost cutting and layoffs. That era is coming to an end.

We believe that the bigger opportunity today for investors is in the next generation of companies of technology companies. We see a very long runway ahead for the cloud, driven by continued digital transformation with AI-based business transformation, including automation and analytics being layered on top. All of this is being built on a new modern technology architecture in which we have significant investments. Many of these companies will be direct beneficiaries of more data in the cloud and “free riders” of hyperscale capex – reaping the benefits but not spending the money. For this cohort of companies, we see accelerating topline growth off already high bases and significant operating leverage as they are untethered from increased costs and are direct beneficiaries of the demand it brings. We are very excited about what lies ahead.

Notable changes to the Fund’s sector allocation during the past twelve months included a decrease in the Consumer Discretionary and Financials sectors and an increase in the Information Technology sector weighting. From a regional standpoint, there

was a significant increase in the weighting to U.S. companies, with decreases in the weightings of several other companies. The weighting of several countries went to zero, as the positions from those countries were exited. Sector and country weights in our Portfolio are derived strictly from our bottom-up stock selection process.

We employ a disciplined, repeatable, and proven investment process that focuses on a bottom-up stock selection approach. This process leads us to building concentrated portfolios of 20–25 companies. Our investment process begins by screening the universe of all publicly listed companies to seek out those with high revenue growth, high earnings growth and the ability to become significantly larger companies over time. Companies included in benchmarks are there solely due to capitalization size and not due to any fundamental or qualitative factors. We are active stock pickers. The universe of stocks available for inclusion in our portfolios is limited to those that meet our investment criteria, not to those contained in the benchmark. We do not concern ourselves with what companies are held in the benchmark and as a result, our portfolios are very different from their benchmarks. It is our job to beat the index over time, not be the index.

The Fund's net asset value decreased to \$189.2 million at June 30, 2024, from \$304.1 million at June 30, 2023. This change was composed of net redemptions of \$96.1 million and investment performance of $-\$18.8$ million. The investment performance of the Fund includes income and expenses which vary year over year. The Fund's income and expenses changed compared to the previous year mainly as a result of fluctuations in average net assets, portfolio activity and changes in the Fund's income earning investments.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the Manager from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The Manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

Recent Developments

Fund Conversion

Effective June 21, 2024, Dynamic Global Growth Opportunities Fund offered by Offering Memorandum was converted to a Publicly-Offered Alternative Mutual Fund under National Instrument 81-102 – Investment Funds (“NI 81-102”). Prior to this date, the Fund offered Series A and Series F units privately since March 9, 2015.

Fixed Administration Fee Change

Effective June 21, 2024, a fixed administration fee rate of 0.05% will be charged to Series A and F units of the Fund.

Related Party Transactions

The Manager is a wholly-owned subsidiary of The Bank of Nova Scotia (“Scotiabank”). Scotiabank also owns, directly or indirectly, 100% of Scotia Securities Inc., a mutual fund dealer, and Scotia Capital Inc. (which includes ScotiaMcLeod and Scotia iTRADE), an investment dealer.

The Manager, on behalf of the Fund, may enter into transactions or arrangements with other members of Scotiabank or certain other companies that are related or connected to the Manager (each a “related party”). All transactions between the Fund and the related parties are in the normal course of business and are carried out at arm's length terms.

The purpose of this section is to provide a brief description of any transaction involving the Fund and a related party.

Management Fees

The Manager is responsible for the day-to-day management and operations of the Fund. Certain series of the Fund pays the Manager a management fee for its services as described in the “Management Fee” section later in this document. The management fee is an annualized rate based on the net asset value of each series of the Fund, accrued and calculated daily and paid monthly.

Fixed Administration Fees and Fund Costs

The Manager pays the operating expenses of the Fund, other than Fund Costs, in exchange for the payment by the Fund of a fixed rate administration fee (the “Fixed Administration Fee”) to the Manager with respect to each series of the Fund. The expenses charged to the Fund in respect of the Fixed Administration Fee are disclosed in the Fund's financial statements. The Fixed Administration Fee is equal to a specified percentage of the net asset value of a series, calculated and paid in the same manner as the management fees for the Fund. Further details about the Fixed Administration Fee can be found in the Fund's most recent simplified prospectus.

In addition, each series of the Fund is responsible for its proportionate share of certain operating expenses (“Fund Costs”). Further details about Fund Costs can be found in the Fund's most recent simplified prospectus.

The Manager, at its sole discretion, may waive or absorb a portion of a series' expenses. These waivers or absorptions may be terminated at any time without notice.

Performance Fees

The Manager is entitled to an annual performance fee based on the performance of the Fund as compared to the performance of a benchmark, as described in the Fund's simplified prospectus. Performance fees are calculated on a calendar year basis.

Distribution Services

Certain registered dealers through which units of the Fund are distributed are related parties to the Fund and the Manager. The Manager may pay a trailing commission, which is negotiated with

dealers, to dealers for their financial advisors in respect of the assets of their clients invested in securities of the Fund. The Manager, during the period, could also pay trailing commissions to dealers for securities purchased or held through discount brokerage accounts.

Other Fees

The Manager, or its affiliates, may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, foreign exchange or derivatives transactions. The Manager, or its affiliates, may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies.

Independent Review Committee

The Manager has established an independent review committee (the "IRC") in accordance with National Instrument 81-107 – Independent Review Committee for Investment Funds ("NI 81-107") with a mandate to review and provide recommendations or approval, as required, on conflict of interest matters referred to it by the Manager on behalf of the Fund. The IRC is responsible for overseeing the Manager's decisions in situations where the Manager is faced with any present or perceived conflicts of interest, all in accordance with NI 81-107.

The IRC may also approve certain mergers between the Fund and other funds, and any change of the auditor of the Fund. Subject to any corporate and securities law requirements, no securityholder approval will be obtained in such circumstances, but you will be sent a written notice at least 60 days before the effective date of any such transaction or change of auditor. In certain circumstances, securityholder approval may be required to approve certain mergers.

The IRC has four members, Stephen J. Griggs (Chair), Steven Donald, Heather A. T. Hunter and Jennifer L. Witterick, each of whom is independent of the Manager.

The IRC prepares and files a report to the securityholders each fiscal year that describes the IRC and its activities for securityholders as well as contains a complete list of the standing instructions. These standing instructions enable the Manager to act in a particular conflict of interest matter on a continuing basis provided the Manager complies with its policies and procedures established to address that conflict of interest matter and reports periodically to the IRC on the matter. This report to the securityholders is available on the Manager's website or, at no cost, by contacting the Manager.

The compensation and other reasonable expenses of the IRC will be paid out of the assets of the Fund as well as out of the assets of the other investment funds for which the IRC may act as the independent review committee. Each member of the IRC receives an annual retainer of \$62,000 (\$77,000 for the Chair), plus expenses for each meeting. The fees and expenses, plus associated legal costs, are allocated among all of the funds managed by the

Manager for which the IRC acts as the independent review committee in a manner that is considered by the Manager to be fair and reasonable. The main component of compensation is an annual retainer fee. Prior to November 1, 2021, each IRC member also received a fee for each committee meeting attended. Expenses of the IRC may include premiums for insurance coverage, travel expenses and reasonable out-of-pocket expenses.

The Manager, in respect of the Fund, received the following standing instructions from the IRC with respect to related party transactions:

- Paying brokerage commissions and spreads to a related party for effecting security transactions on an agency and principal basis on behalf of the Fund;
- Purchases or sales of securities of an issuer from or to another investment fund managed by the Manager;
- Investments in the securities of issuers for which a related underwriter acted as an underwriter during the distribution of such securities and the 60-day period following the completion of such distribution;
- Executing foreign exchange transactions with a related party on behalf of the Fund;
- Purchases of securities of a related party;
- Entering into over-the-counter derivatives on behalf of the Fund with a related party;
- Outsourcing products and services to related parties which can be charged to the Fund;
- Acquisition of prohibited securities as defined by securities regulations;
- Trading in mortgages with a related party;
- Entering into a designated broker agreement with a related party; and
- Entering into a prime broker agreement with a related party.

The Manager is required to advise the IRC of any breach of a condition of the standing instructions. The standing instructions require, among other things, that the investment decision in respect to a related party transaction: (a) is made by the Manager free from any influence by an entity related to the Manager and without taking into account any consideration to any associate or affiliate of the Manager; (b) represents the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; and (c) is made in compliance with the Manager's written policies and procedures. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC to monitor compliance.

The Manager, in respect of the Fund, did not rely on IRC standing instructions regarding related party transactions during the period.

Financial Highlights

The following tables show selected key financial information about each series of the Fund and are intended to help you understand the Fund's financial performance for the periods indicated. The information on the following tables is based on prescribed regulations and as a result, is not expected to add across due to the increase (decrease) in net assets from operations being based on average units outstanding during the period and all other numbers being based on actual units outstanding at the relevant point in time. Footnotes for the tables are found at the end of the Financial Highlights section.

The Fund's Net Assets per Unit (\$) ⁽¹⁾

For the period ended	Net Assets, beginning of period	Increase (decrease) from operations					Distributions				Net Assets, end of period ⁽¹⁾	
		Total revenue	Total expenses	Realized gains (losses) for the period	Unrealized gains (losses) for the period	Total increase (decrease) from operations ⁽²⁾	From net investment income (excluding dividends)	From dividends	From capital gains	Return of capital		Total distributions ⁽³⁾
Series A												
June 30, 2024	10.66	0.02	(0.31)	0.24	(0.52)	(0.57)	—	—	—	—	—	10.18
June 30, 2023	10.46	0.05	(0.32)	(2.51)	2.98	0.20	—	—	—	—	—	10.66
Series F												
June 30, 2024	11.34	0.03	(0.23)	0.18	(0.83)	(0.85)	—	—	—	—	—	10.95
June 30, 2023	11.02	0.05	(0.23)	(2.65)	3.06	0.23	—	—	—	—	—	11.34

(1) This information is derived from the Fund's audited annual financial statements. The net assets per unit presented in the financial statements may differ from the net asset value per unit. An explanation of these differences can be found in note 2 of the Fund's financial statements. The net asset value per unit at the end of the period is disclosed in Ratios and Supplemental Data.

(2) Net assets per unit and distributions per unit are based on the actual number of units outstanding for the relevant series at the relevant time. The increase (decrease) in net assets from operations per unit is based on the weighted average number of units outstanding for the relevant series over the period.

(3) Distributions were paid in cash or reinvested in additional units of the Fund.

Ratios and Supplemental Data

As at	Total net asset value (in \$000s) ⁽¹⁾	Number of units outstanding ⁽¹⁾	Management expense ratio ("MER") (%) ⁽²⁾	MER before waivers or absorptions (%) ⁽²⁾	Trading expense ratio ("TER") (%) ⁽³⁾	Portfolio turnover rate (%) ⁽⁴⁾	Net asset value per unit (\$) ⁽⁴⁾
Series A							
June 30, 2024	13,432	1,319,442	2.49	2.49	0.72	455.18	10.18
June 30, 2023	16,209	1,520,454	2.48	2.48	0.55	351.75	10.66
Series F							
June 30, 2024	162,383	14,833,195	1.47	1.47	0.72	455.18	10.95
June 30, 2023	272,418	24,005,991	1.44	1.44	0.55	351.75	11.34

(1) This information is provided as at the period end of the years shown.

(2) The management expense ratio is based on the total expenses (including sales tax, and excluding commissions and other portfolio transaction costs) of each series of the Fund and a proportional share of underlying funds' expenses (mutual funds, ETFs and closed-end funds), where applicable, for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs, short borrowing costs and interest on leverage of the Fund and the underlying funds, where applicable, expressed as an annualized percentage of daily average net asset value of the Fund during the period.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fee

The management fee is an annualized rate based on the net asset value of each series of the Fund, accrued and calculated daily and paid monthly. The management fees cover the costs of managing the Fund, arranging for investment analysis, recommendations and investment decision making for the Fund, arranging for distribution of the Fund, marketing and promotion of the Fund and providing or arranging for other services.

The breakdown of services received in consideration of management fees for each series, as a percentage of the management fees, are as follows:

	Management fees (%)	Dealer compensation (%)	Other [†] (%)
Series A	2.25	42.9	57.1
Series C	2.25	41.3	58.7
Series F	1.25	—	100.0

[†] Relates to all services provided by the Manager described above except dealer compensation.

Past Performance

The following shows the past performance for each series and will not necessarily indicate how the Fund will perform in the future. The information shown assumes that all distributions made by each series of the Fund in the periods shown were reinvested in additional units of the relevant series. In addition, the information does not take into account sales, redemption,

distribution or other optional charges that would have reduced returns or performance.

In reviewing the Fund's past performance information, you should consider that: (i) the Fund was not a reporting issuer prior to June 20, 2024; (ii) the expenses of the Fund would have been higher during the period prior to June 20, 2024 had the Fund been subject to the additional requirements applicable to reporting issuers; (iii) during the time it was not a reporting issuer, the Fund was not subject to the investment restrictions and practices in National Instrument 81-102 Investment Funds; and (iv) 1832 Asset Management L.P. has obtained exemptive relief on behalf of the Fund to permit the disclosure of the prior performance data for the Fund for the time period prior to it becoming a reporting issuer.

Year-by-Year Returns

The following charts show the performance for each series of the Fund and illustrate how performance has varied from year to year. The charts show, in percentage terms, how much an investment held on the first day of each fiscal year would have increased or decreased by the last day of each fiscal year for that series.

(for fiscal years ended June 30)

Annual Compound Returns

The annual compound returns table below compares each series of the Fund's performance to one or more benchmarks. A benchmark is usually an index or a composite of more than one index. Fund returns are reported net of all management fees and expenses for all series, unlike the return of benchmarks which are based on the performance of an index that does not pay fees or incur expenses.

		One Year	Three Years	Five Years	Since Inception
Series A Units					
Morningstar Global Markets Small-Mid Cap (C\$)	%	-4.5	-12.8	2.5	7.9
Series F Units					
Morningstar Global Markets Small-Mid Cap (C\$)	%	15.4	4.3	8.7	8.2

		One Year	Three Years	Five Years	Since Inception
Series F Units					
Morningstar Global Markets Small-Mid Cap (C\$)	%	-3.5	-12.0	3.5	8.8
Series A Units					
Morningstar Global Markets Small-Mid Cap (C\$)	%	15.4	4.3	8.7	8.2

Index Descriptions

Morningstar Global Markets Small-Mid Cap (C\$) – This index measures the performance of small- and mid-cap stocks in developed and emerging markets. It targets securities that fall between the 70% and 97% market cap thresholds of the investable universe.

A discussion of the performance of the Fund as compared to its benchmarks is found in the Results of Operations section of this report.

Summary of Investment Portfolio

The Summary of Investment Portfolio may change due to ongoing portfolio transactions. A quarterly portfolio update is available to the investor at no cost by calling 1-800-268-8186, or by visiting www.dynamic.ca, 60 days after quarter end, except for June 30, which is the fiscal year end, when they are available after 90 days.
