

Dynamic Power Global Balanced Class

Interim Management Report of Fund Performance

For the period ended December 31, 2025

This interim management report of fund performance contains financial highlights but does not contain either the interim financial statements or annual financial statements of the investment fund. You can get a copy of the interim financial statements or annual financial statements at your request, and at no cost, by calling toll-free 1-800-268-8186, by writing to us at 1832 Asset Management L.P., 40 Temperance Street, 16th Floor, Toronto, ON, M5H 0B4 or by visiting our website at www.dynamic.ca or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

1832 Asset Management L.P. is the manager (the "Manager") of the Fund. In this document, "we", "us", "our" and the "Manager" refer to 1832 Asset Management L.P. and the "Fund" refers to Dynamic Power Global Balanced Class.

The term "net asset value" or "net asset value per share" in this document refers to the net asset value determined in accordance with Part 14 of National Instrument 81-106 – Investment Fund Continuous Disclosure ("National Instrument 81-106"); while the term "net assets" or "net assets per share" refers to total equity or net assets attributable to shareholders of the Fund as determined in accordance with IFRS Accounting Standards.

Caution Regarding Forward-Looking Statements

Certain portions of this report, including, but not limited to, "Recent Developments", may contain forward-looking statements about the Fund and the underlying funds, as applicable, including statements with respect to strategies, risks, expected performance events and conditions. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "projects" and similar forward-looking expressions or negative versions thereof.

In addition, any statement that may be made concerning future performance, strategies or prospects and possible future action by the Fund is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future general economic, political and relevant market factors, such as interest rates, foreign exchange rates, equity and capital markets, and the general business environment, in each case assuming no changes to applicable tax or other laws or government regulation. Expectations and projections about future events are inherently subject to, among other things, risks and uncertainties, some of which may be unforeseeable.

Accordingly, current assumptions concerning future economic and other factors may prove to be incorrect at a future date.

Forward-looking statements are not guarantees of future performance and actual results or events could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, such as interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government relations, unexpected judicial or regulatory proceedings and catastrophic events. We stress that the above mentioned list of important factors is not exhaustive. Some of these risks, uncertainties and other factors are described in the Fund's simplified prospectus, under the heading "Risk Factors".

We encourage you to consider these and other factors carefully before making any investment decisions. Forward-looking statements should not be unduly relied upon. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next management report of fund performance, and that the forward-looking statements speak only to the date of this management report of fund performance.

Results of Operations

For the six-month period ended at December 31, 2025 (the "period"), the Series A shares of the Fund generated a total return of -0.8%. Fund returns are reported net of all management fees and expenses for all series, unlike the returns of the Fund's benchmark, which is based on the performance of an index that does not pay fees or incur expenses. Returns for other series of the Fund will be similar to Series A with any difference in performance being primarily due to different management fees, operating expenses and other expenses that are applicable to that particular series. Please see the "Past Performance" section for the performance of the Fund's other series.

To achieve its long-term asset allocation mandate, the Fund invested directly in fund(s) managed by the Manager or by third party investment managers ("Underlying Fund(s)"). As a result the following commentary on investment portfolio activity relates to the Underlying Fund(s). Commentary on income, expenses and shareholder activity relate to the Fund.

The Fund's broad-based benchmarks, the MSCI World Index (C\$) and the J.P. Morgan Global Government Bond Index (C\$) returned 11.5% and returned 0.0%, respectively, during the same period. In accordance with National Instrument 81-106, we have

included a comparison to broad-based indices to help you understand the Fund's performance relative to the general performance of the market, but caution that the Fund's mandate may be significantly different from the indices shown.

The Fund's blended benchmark, 50% J.P. Morgan Global Government Bond Index (C\$) and 50% MSCI World Index (C\$) returned 5.6% during the same period. We have included this comparison, which more closely reflects the market sectors and/or asset classes in which the Fund invests, to provide a more useful comparative to the performance of the Fund.

The Fund underperformed the benchmark during the period due primarily to stock selection in the Consumer Discretionary and Communication Services sectors. Not owning any stocks in the Consumer Staples sector was a key positive for relative performance.

Global equities advanced over the 6-month period as the MSCI World Index (C\$) returned 11.5%. The second half of 2025 can be characterized as a reversal of fortune from the first half as investors had a risk on sentiment and witnessed equity markets rallying double digits over the period.

While inflation concerns remain elevated, fears of a tariff-driven price spike similar to 2022 proved unfounded and central banks were able to continue normalizing interest rates.

The U.S. economy expanded at an annual rate of 4.3% in the third quarter, the highest growth rate in two years. Despite a resilient economy with strong GDP growth, the labor market struggled as the unemployment rate inched up to 4.4%, leading the U.S. Federal Reserve (Fed) to cut interest rates three times over the period from 4.50% to 3.75%, which is now at a three-year low.

In the Eurozone, investor confidence was bolstered by the continued Fed rate cuts, which helped ease global financial conditions and reduce risks for European assets. Economic conditions across the eurozone remained mixed. Manufacturing activity, especially in Germany, continued to contract and that negatively affected export-focused sectors. Services activity stayed strong, however and that helped overall business activity expand modestly. The European Central Bank kept policy rates unchanged for the period, while vowing to maintain a careful watch on growth and price trends.

Emerging markets was one of the top-performing regions. Equity gains were mainly driven from the technology-oriented markets of South Korea and Taiwan.

Precious metals were the standout asset class for the period. Gold dominated the headlines as international central banks continued to diversify their reserve holdings into the precious metal.

All 11 GICS (Global Industry Classification Standard) sectors posted positive returns over the 6-month period, with Communication Services, Materials and Health Care being the largest contributors to index returns. The worst performing sectors were Real Estate, Consumer Staples and Industrials.

The year began with investors still myopically concentrated in mega-cap technology leaders, but as 2025 progressed, investors soured on their massive free-cash flow collapse caused by AI spending. By year-end, only two of the seven "Mags" outperformed the market. The money leaving those names did not flow into mid-cap growth stocks as the Morningstar Mid-Cap Growth Index was only up 0.52% in Canadian dollars for 2025. The biggest winners in 2025 were traditional value stocks. The biggest detractor from total returns for Canadian investors was the nearly 5.5% decline the U.S. dollar faced versus the Canadian dollar.

After the "Liberation Day" tariff announcements briefly but deeply hammered global markets, equities quickly rebounded to new highs within months. The second half of 2025 saw a striking rotation: banks and deep cyclicals such as energy, industrials and materials dramatically outperformed at the expense of technology, communications and consumer discretionary sectors. Even within technology, cyclical segments like disk drives and memory, experienced major rallies, reflecting investors' willingness to chase successive AI bottlenecks – from GPUs to memory and power. This was at the expense of other areas of technology. It was an impressive year for Nvidia up ~39% in 2025 but that was dwarfed by gains in Citigroup up ~66%, Intel up ~80% and Caterpillar up ~58%. In Europe, the value rally was similarly extreme with banking names like Santander and ABM AMRO up over 100% each.

As we enter 2026, broad macro data indicates that a "normal" economic expansion remains firmly intact, with major risks to that trajectory having declined over the past year, though geopolitics always remains a wild card. Several themes, driven from our bottom up analysis, guide our positioning for the next number of years: the continued expansion of AI to the edge and application layer, as the days of merely training models on the history of the internet end and the next phase of investment focuses on enterprise data and agentic AI systems embedding intelligence directly into workflows; the strengthening of small and mid-sized businesses, set to benefit from new tax reductions, regulatory easing and improved credit conditions, especially under a pro-business policy environment, with companies enabling SMB productivity through marketing software and AI automation well positioned as the world moves from a search economy to an answers economy and more breakthroughs in biotechnology. Finally, we expect a re-acceleration in M&A and some large, anticipated IPO activity in what will be a supportive regulatory backdrop and healthy equity markets, with many companies in our portfolios standing to benefit directly from this resurgence, either as strategic targets or acquirers.

The market continues to violently rotate from bottleneck to bottleneck in the "picks, shovels and power" phase of AI – from concentrating on Nvidia in 2023 and early 2024 to 2025 where sectors like disk drives and memory that had not grown revenues in a decade, went up 200–500% in 2025. We believe that many of the big winners of AI have yet to emerge.

Much like the era of the personal computer, the internet, mobility and the cloud, AI is a technology platform shift. Platform shifts in technology matter for investors because they redefine who

creates and captures value, reshaping profit pools, market shares and long-term winners and losers.

The Canadian bond market, as represented by the FTSE Canada Universe Bond Index, returned 1.2% for the 6-month period ending December 31, 2025. The 10-year Government of Canada yield rose as high as 3.6% in July before falling to 3.0% in November. It ultimately rallied and ended the period at 3.4%. After holding the policy rate steady for 3 consecutive meetings, the Bank of Canada (BoC) resumed its rate cutting cycle with a 25 basis points (bps) rate cut in both September and October. These cuts brought the overnight rate to 2.25% by period end. Investment grade and high yield credit spreads, as measured by ICE BofA Canadian corporate indices OAS (Option-Adjusted Spread) remained in a relatively tight range for the duration of the period. After the volatility earlier in the year, strong corporate fundamentals and demand for debt (specifically Investment Grade) resulted in more stable market conditions and tighter spreads.

At the end of the period, the Fund was comprised of four of the eleven sectors of the S&P 500 Index. Information Technology was the highest weighted sector at approximately 71%.

Four of the top ten stock detractors from Fund performance were from the Consumer Discretionary sector and two of those stocks were not held by the benchmark. Amazon.com did not meet our investment criteria, so we did not own it. It was a notable contributor to benchmark performance.

Consumer Staples was the worst performing sector, for the index during the past six months; thus, not owning companies from the sector was a key positive for relative performance.

The units of Dynamic Canadian Bond Fund that were held during the period outperformed the benchmark. An overweight allocation to Corporate Bonds and Investment Grade in particular, were primary contributors to this outperformance as corporate bonds outperformed government bonds. Rigorous issuer selection was also an alpha driver. This outperformance materialized in the second half of 2025 where the Fund delivered positive performance and the benchmark was flat. Early in the period, the Fund was positioned for a yield curve flattener, which ultimately was a detractor as the yield curve steepened.

Notable equity sector changes during the past six months included increases in the Fund's Information Technology and Health Care weightings and decreases to the Industrials, Consumer Discretionary and Communication Services weightings. By period end, all Industrials and Communication Services companies were sold. Notable changes to country weightings included an increase to the weightings of Brazil and Taiwan and all companies from Israel and Singapore were sold. Sector and country weights in our portfolio are derived strictly from our bottom-up stock selection process.

We employ a disciplined, repeatable and proven investment process that focuses on a bottom-up stock selection approach. This process leads us to building concentrated portfolios of 20–25 companies. Our investment process begins by screening the universe of all publicly listed companies to seek out those with high revenue growth, high earnings growth and the ability to

become significantly larger companies over time. Companies included in benchmarks are there solely due to capitalization size and not due to any fundamental or qualitative factors. We are active stock pickers. The universe of stocks available for inclusion in our portfolios is limited to those that meet our investment criteria, not to those contained in the benchmark. We do not concern ourselves with what companies are held in the benchmark and as a result, our portfolios are very different from their benchmarks. It is our job to beat the index over time, not be the index.

The Fund's net asset value decreased to \$206.0 million at December 31, 2025, from \$243.7 million at June 30, 2025. This change was composed of net redemptions of \$37.0 million, and investment performance of \$(0.4) million and cash distributions of \$0.1 million. The investment performance of the Fund includes income and expenses which vary year over year. The Fund's income and expenses changed compared to the previous year mainly as a result of fluctuations in average net assets, portfolio activity and changes in the Fund's income earning investments.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the Manager from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The Manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

Recent Developments

There have been no recent developments that have affected, or are likely to materially affect the Fund.

Related Party Transactions

The Manager is a wholly-owned subsidiary of The Bank of Nova Scotia ("Scotiabank"). Scotiabank also owns, directly or indirectly, 100% of Scotia Securities Inc., a mutual fund dealer, and Scotia Capital Inc. (which includes ScotiaMcLeod and Scotia iTRADE), an investment dealer.

The Manager, on behalf of the Fund, may enter into transactions or arrangements with other members of Scotiabank or certain other companies that are related or connected to the Manager (each a "related party"). All transactions between the Fund and the related parties are in the normal course of business and are carried out at arm's length terms.

The purpose of this section is to provide a brief description of any transaction involving the Fund and a related party.

Management Fees

The Manager is responsible for the day-to-day management and operations of the Fund. Certain series of the Fund pay the Manager a management fee for its services as described in the "Management Fee" section later in this document. The management fee is an

annualized rate based on the net asset value of each series of the Fund, accrued daily and calculated and paid monthly.

Fixed Administration Fees and Fund Costs

The Manager pays the operating expenses of the Fund, other than Fund Costs, in exchange for the payment by the Fund of a fixed rate administration fee (the “Fixed Administration Fee”) to the Manager with respect to each series of the Fund. The expenses charged to the Fund in respect of the Fixed Administration Fee are disclosed in the Fund’s financial statements. The Fixed Administration Fee is equal to a specified percentage of the net asset value of a series, calculated and paid in the same manner as the management fees for the Fund. Further details about the Fixed Administration Fee can be found in the Fund’s most recent simplified prospectus.

In addition, each series of the Fund is responsible for its proportionate share of certain operating expenses (“Fund Costs”). Further details about Fund Costs can be found in the Fund’s most recent simplified prospectus.

The Manager, at its sole discretion, may waive or absorb a portion of a series’ expenses. These waivers or absorptions may be terminated at any time without notice.

Performance Fees

The Manager is entitled to an annual performance fee based on the performance of the Fund as compared to the performance of a benchmark, as described in the Fund’s simplified prospectus. Performance fees are calculated on a calendar year basis.

Distribution Services

Certain registered dealers through which shares of the Fund are distributed are related parties to the Fund and the Manager. The Manager may pay a trailing commission, which is negotiated with dealers, to dealers for their financial advisors in respect of the assets of their clients invested in securities of the Fund. The Manager, during the period, could also pay trailing commissions to dealers for securities purchased or held through discount brokerage accounts.

Other Fees

The Manager, or its affiliates, may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, foreign exchange or derivatives transactions. The Manager, or its affiliates, may earn a foreign exchange spread when shareholders switch between series of funds denominated in different currencies.

Independent Review Committee

The Manager has established an independent review committee (the “IRC”) in accordance with National Instrument 81-107 – Independent Review Committee for Investment Funds (“NI 81-107”) with a mandate to review and provide recommendations or approval, as required, on conflict of interest matters referred to it by the Manager on behalf of the Fund. The IRC is responsible for overseeing the Manager’s decisions in

situations where the Manager is faced with any present or perceived conflicts of interest, all in accordance with NI 81-107.

The IRC may also approve certain mergers between the Fund and other funds, and any change of the auditor of the Fund. Subject to any corporate and securities law requirements, no securityholder approval will be obtained in such circumstances, but you will be sent a written notice at least 60 days before the effective date of any such transaction or change of auditor. In certain circumstances, securityholder approval may be required to approve certain mergers.

The IRC has four members, Stephen J. Griggs (Chair), Steven Donald, Heather A. T. Hunter and Cecilia Mo, each of whom is independent of the Manager.

The IRC prepares and files a report to the securityholders each fiscal year that describes the IRC and its activities for securityholders as well as contains a complete list of the standing instructions. These standing instructions enable the Manager to act in a particular conflict of interest matter on a continuing basis provided the Manager complies with its policies and procedures established to address that conflict of interest matter and reports periodically to the IRC on the matter. This report to the securityholders is available on the Manager’s website or, at no cost, by contacting the Manager.

The compensation and other reasonable expenses of the IRC will be paid out of the assets of the Fund as well as out of the assets of the other investment funds for which the IRC may act as the independent review committee. Each member of the IRC receives an annual retainer of \$62,000 (\$77,000 for the Chair), plus expenses for each meeting. The fees and expenses, plus associated legal costs, are split equally among all of the funds managed by the Manager for which the IRC acts as the independent review committee. The main component of compensation is an annual retainer fee. Expenses of the IRC may include premiums for insurance coverage, travel expenses and reasonable out-of-pocket expenses.

The Manager, in respect of the Fund, received the following standing instructions from the IRC with respect to related party transactions:

- Paying brokerage commissions and spreads to a related party for effecting security transactions on an agency and principal basis on behalf of the Fund;
- Purchases or sales of securities of an issuer from or to another investment fund managed by the Manager;
- Investments in the securities of issuers for which a related underwriter acted as an underwriter during the distribution of such securities and the 60-day period following the completion of such distribution;
- Executing foreign exchange transactions with a related party on behalf of the Fund;
- Purchases of securities of a related party;
- Entering into over-the-counter derivatives on behalf of the Fund with a related party;

- Outsourcing products and services to related parties which can be charged to the Fund;
- Acquisition of prohibited securities as defined by securities regulations;
- Trading in mortgages with a related party;
- Entering into a designated broker agreement with a related party; and
- Entering into a prime broker agreement with a related party.

The Manager is required to advise the IRC of any breach of a condition of the standing instructions. The standing instructions require, among other things, that the investment decision in respect

to a related party transaction: (a) is made by the Manager free from any influence by an entity related to the Manager and without taking into account any consideration to any associate or affiliate of the Manager; (b) represents the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; and (c) is made in compliance with the Manager's written policies and procedures. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC to monitor compliance.

The Manager, in respect of the Fund, did not rely on IRC standing instructions regarding related party transactions during the period.

Financial Highlights

The following tables show selected key financial information about each series of the Fund and are intended to help you understand the Fund's financial performance for the periods indicated. The information on the following tables is based on prescribed regulations and as a result, is not expected to add across due to the increase (decrease) in net assets from operations being based on average shares outstanding during the period and all other numbers being based on actual shares outstanding at the relevant point in time. Footnotes for the tables are found at the end of the Financial Highlights section.

(1) This information is derived from the Fund's interim and audited annual financial statements. The net assets per share presented in the financial statements may differ from the net asset value per share. An explanation of these differences can be found in note 2 of the Fund's financial statements. The net asset value per share at the end of the period is disclosed in Ratios and Supplemental Data.

(2) Net assets per share and distributions per share are based on the actual number of shares outstanding for the relevant series at the relevant time. The increase (decrease) in net assets from operations per share is based on the weighted average number of shares outstanding for the relevant series over the period.

(3) Distributions were paid in cash or reinvested in additional shares of the Fund.

* Annualized

(1) This information is provided as at the period end of the years shown.

(2) The management expense ratio is based on the total expenses (including sales tax, and excluding commissions and other portfolio transaction costs) of each series of the Fund and a proportional share of underlying funds' expenses (mutual funds, ETFs and closed-end funds), where applicable, for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs, short borrowing costs and interest on leverage of the Fund and the underlying funds, where applicable, expressed as an annualized percentage of daily average net asset value of the Fund during the period.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

The management fee is an annualized rate based on the net asset value of each series of the Fund, accrued daily and calculated and paid monthly. The management fees cover the costs of managing the Fund, arranging for investment analysis, recommendations and investment decision making for the Fund, arranging for distribution of the Fund, marketing and promotion of the Fund and providing or arranging for other services.

The breakdown of services received in consideration of management fees for each series, as a percentage of the management fees, are as follows:

	Management fees (%)	Dealer compensation (%)	Other [†] (%)
Series A	2.00	48.8	51.2
Series F	1.00	—	100.0
Series FT	1.00	—	100.0
Series IP*	n/a	—	—
Series T	2.00	48.9	51.1

* The management fee for this series is negotiated and paid directly by these shareholders and not by the Fund.

† Relates to all services provided by the Manager described above except dealer compensation.

Past Performance

The following shows the past performance for each series and will not necessarily indicate how the Fund will perform in the future. The information shown assumes that all distributions made by each series of the Fund in the periods shown were reinvested in additional shares of the relevant series. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following charts show the performance for each series of the Fund and illustrate how performance has varied from year to year. The charts show, in percentage terms, how much an investment held on the first day of each fiscal year would have increased or decreased by the last day of each fiscal year for that series.

(for fiscal years ended June 30)

(1) Six-month period ended December 31, 2025.

Summary of Investment Portfolio

The Summary of Investment Portfolio may change due to ongoing portfolio transactions. A quarterly portfolio update is available to the investor at no cost by calling 1-800-268-8186, or by visiting www.dynamic.ca, 60 days after quarter end, except for June 30, which is the fiscal year end, when they are available after 90 days.

By Asset Type	Percentage of net asset value
Underlying Funds	99.9
Cash and Short Term Instruments (Bank Overdraft)	0.2
Other Net Assets (Liabilities)	-0.1

By Country / Region⁽¹⁾	Percentage of net asset value
Canada	99.9
Cash and Short Term Instruments (Bank Overdraft)	0.2

By Industry⁽¹⁾⁽²⁾	Percentage of net asset value
Foreign Equity Funds	71.5
Fixed Income Funds	28.4
Cash and Short Term Instruments (Bank Overdraft)	0.2

Top Holdings*	Percentage of net asset value
Dynamic Power Global Growth Fund, Series "O"	71.5
Dynamic Canadian Bond Fund, Series "O"	28.4
Cash and Short Term Instruments (Bank Overdraft)	0.2

(1) Excludes other net assets (liabilities) and derivatives.

(2) Excludes bonds and debentures.

* Securities legislation requires the top 25 holdings of the Fund to be presented; however, the Fund currently has less than 25 holdings.
