

Dynamic Liquid Alternatives Private Pool

Interim Management Report of Fund Performance

For the period ended December 31, 2025

This interim management report of fund performance contains financial highlights but does not contain either the interim financial statements or annual financial statements of the investment fund. You can get a copy of the interim financial statements or annual financial statements at your request, and at no cost, by calling toll-free 1-800-268-8186, by writing to us at 1832 Asset Management L.P., 40 Temperance Street, 16th Floor, Toronto, ON, M5H 0B4 or by visiting our website at www.dynamic.ca or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

1832 Asset Management L.P. is the manager (the "Manager") of the Fund. In this document, "we", "us", "our" and the "Manager" refer to 1832 Asset Management L.P. and the "Fund" refers to Dynamic Liquid Alternatives Private Pool.

The term "net asset value" or "net asset value per unit" in this document refers to the net asset value determined in accordance with Part 14 of National Instrument 81-106 – Investment Fund Continuous Disclosure ("National Instrument 81-106"); while the term "net assets" or "net assets per unit" refers to total equity or net assets attributable to unitholders of the Fund as determined in accordance with IFRS Accounting Standards.

Caution Regarding Forward-Looking Statements

Certain portions of this report, including, but not limited to, "Recent Developments", may contain forward-looking statements about the Fund and the underlying funds, as applicable, including statements with respect to strategies, risks, expected performance events and conditions. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "projects" and similar forward-looking expressions or negative versions thereof.

In addition, any statement that may be made concerning future performance, strategies or prospects and possible future action by the Fund is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future general economic, political and relevant market factors, such as interest rates, foreign exchange rates, equity and capital markets, and the general business environment, in each case assuming no changes to applicable tax or other laws or government regulation. Expectations and projections about future events are inherently subject to, among other things, risks

and uncertainties, some of which may be unforeseeable. Accordingly, current assumptions concerning future economic and other factors may prove to be incorrect at a future date.

Forward-looking statements are not guarantees of future performance and actual results or events could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, such as interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government relations, unexpected judicial or regulatory proceedings and catastrophic events. We stress that the above mentioned list of important factors is not exhaustive. Some of these risks, uncertainties and other factors are described in the Fund's simplified prospectus, under the heading "Risk Factors".

We encourage you to consider these and other factors carefully before making any investment decisions. Forward-looking statements should not be unduly relied upon. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next management report of fund performance, and that the forward-looking statements speak only to the date of this management report of fund performance.

Results of Operations

For the six-month period ended at December 31, 2025 (the "period"), the Series A units of the Fund generated a total return of 2.8%. Fund returns are reported net of all management fees and expenses for all series, unlike the returns of the Fund's benchmark, which is based on the performance of an index that does not pay fees or incur expenses. Returns for other series of the Fund will be similar to Series A with any difference in performance being primarily due to different management fees, operating expenses and other expenses that are applicable to that particular series. Please see the "Past Performance" section for the performance of the Fund's other series.

To achieve its long-term asset allocation mandate, the Fund invested directly in fund(s) managed by the Manager or by third party investment managers ("Underlying Fund(s)"). As a result the following commentary on investment portfolio activity relates to the Underlying Fund(s). Commentary on income, expenses and unitholder activity relate to the Fund.

The Fund's broad-based benchmark, the FTSE Canada Short Term Corporate Bond Index returned 2.2% during the same period. In accordance with National Instrument 81-106, we have included a comparison to this broad-based index to help you understand the Fund's performance relative to the general performance of the market, but caution that the Fund's mandate may be significantly different from the indices shown.

The Fund's blended benchmark, 27.5% FTSE Canada 91 Day T-Bill Index, 45% FTSE Canada Short-Term Bond Index, 12.5% FTSE EPRA NAREIT Developed Index (C\$) and 15% Solactive GBS Developed Markets Large & Mid Cap Index (C\$) returned 3.4% during the same period. We have included this comparison, which more closely reflects the market sectors and/or asset classes in which the Fund invests, to provide a more useful comparative to the performance of the Fund.

To achieve its long-term asset allocation mandate, the Fund invested directly in fund(s) managed by the Manager or by third party investment managers ("Underlying Fund(s)"). As a result, the following commentary on investment portfolio activity relates to the Underlying Fund(s). Commentary on income, expenses and unitholder activity relate to the Fund. During the period, the Fund's performance tracked the blended benchmark primarily due to the combined weighted average from underlying holdings; Dynamic Alpha Performance II Fund, Dynamic Credit Absolute Return II Fund, Dynamic Premium Yield PLUS Fund, Dynamic Real Estate & Infrastructure Income II Fund and Dynamic Short Term Credit PLUS Fund.

Dynamic Credit Absolute Return Fund underperformed its blended benchmark but remained aligned with its absolute return objective. During the period, the Fund's aggregate exposure to these strategies ranged from 171.88% to 218.55%. Overall, performance continued to be driven primarily by its core strategy of leveraging high quality 2–5-year investment grade (IG) credit spreads, where the combination of strong security selection, carry and resilient market technicals remained attractive. The Fund's performance also benefited from short term high-quality high yield (HY) holdings, which are used selectively to capture yield and early call optionality. Several issuers, including Strathcona Resources and MEG Energy, were repaid ahead of schedule during the period, contributing positively to returns. The Fund also generated positive performance from securitized products such as Credit Risk Transfer (CRT). CRTs have become an increasingly important component of the portfolio, as most of the exposure was investment grade credit quality, sub 2-year duration and relatively wide spreads compared with corporates bond offering an attractive balance of risk and reward in the current environment. In Q3, the Fund was using CDX IG protection to hedge against macro uncertainty. These hedges were later removed in Q4 to participate in the year-end rally, resulting in a deliberate but mild increase in credit risk duration. Detractors remained modest and were largely limited to temporary hedging costs, most notably from CDX IG protection, prior to those positions being unwound. All foreign currency exposures remained fully hedged to the Canadian dollar throughout the period.

Dynamic Alpha Performance II Fund underperformed its blended benchmark during the period. Stock selection in the Information

Technology and Financials sectors were key contributors to absolute performance. A short on the Vanguard S&P 500 ETF, (which is a hedge against market volatility) was the primary detractor from performance. During the period, the Fund's aggregate exposure to these strategies ranged from 12.47% to 25.76%. The Fund is a global long/short fund. It invests primarily in U.S. and global equities but uses short positions both for alpha purposes and to hedge against market volatility. The Fund will in many cases have a significant cash position that is used to reduce volatility as the goal of the Fund is to protect capital and generate consistent, low volatility returns for its investors. By actively managing its long, short and cash positions, the Fund aims to generate positive returns regardless of the overall direction of the market. At period end, the Fund's cash position was approximately 59% and the Fund was gross long about 63%. Short positions were employed and were used in two ways: 1) Alpha shorts – companies with deteriorating fundamentals are shorted to add alpha to the Fund; and 2) Beta shorts that are used as a hedge against market risk. The goal of the Fund is to provide market participation in terms of returns, with below market volatility. During the period, the Vanguard S&P 500 ETF was shorted as a hedge against market risk to assist in keeping volatility low. As the S&P 500 Index (C\$) returned 11.9% for the period, the short on the Vanguard S&P 500 ETF detracted from performance. The Portfolio Manager will increase or decrease the Fund's net exposure based on his thoughts on the markets and with the goal of keeping volatility low in the Fund. He has more than 23 years of experience managing this type of strategy.

Dynamic Premium Yield PLUS Fund underperformed the blended benchmark due in part to a systematic portfolio hedge in place. During the period, the Fund's aggregate exposure to these strategies ranged from 109.5% to 161.3%. The Fund's largest allocation remained invested in written puts with the weighting increased to 84% (on a normalized basis). Equity positions held in the portfolio were maintained at 16% while covered calls declined to a de minimus percentage (both on a normalized basis). The net equity weighting was reduced by a short S&P 500 position that was used to hedge the portfolio. Geographically, the Fund remained biased to the U.S. with the weight rising to 100%. The largest sector allocations (including derivative positions) were in Information Technology, Industrials and Consumer Discretionary. Exposures to Industrials and Communication Services were increased while the weightings in Consumer Discretionary and Energy were reduced. The top sector contributors were through holdings in Information Technology, Industrials and Health Care with Materials a small detractor to returns. Individual securities that made a positive contribution included Alphabet Inc. and Vertiv Holdings Co. Holdings in Eaton Corporation PLC and Chipotle Mexican Grill Inc. had a negative impact on performance.

Dynamic Short Term Credit Plus Fund outperformed its benchmark for the period. The leveraged structure of the Fund enables it to establish an overweight position in aggregate credit exposure relative to the benchmark. This positioning creates greater carry than what is possible for the benchmark. Additionally, while credit spreads were tight to begin with, they tightened incrementally throughout the period, further contributing to performance. To establish this overweight credit position, the fund

shorted government bonds. As corporate bonds outperformed government bonds throughout the period, this positioning contributed to performance. Leverage was lowered from 2.16x to 1.92x on a hedged basis in Q4 as credit spreads compressed. Shorting government bonds also serves to offset additional interest rate exposure that the Fund's leveraged structure would create if the leverage was generated by borrowing cash. This allowed duration to be managed tactically and kept within a band of 2.2 to 2.8 years throughout the period. A higher duration would have added to performance as yields fell in the second half of the year. Finally, the Fund had an allocation to the U.S., this contributed to performance as U.S. fixed income outperformed Canada this year. All U.S. Dollar exposure was hedged back to Canadian Dollars. Doing so prevented the decline of the U.S. dollar from impacting the Fund's performance.

Dynamic Real Estate and Infrastructure Income II Fund underperformed its blended benchmark as a result of security selection within Utilities. Currency hedging was also a detractor. Both Real Estate and Infrastructure holdings were up over the period with Infrastructure performing better on an absolute return basis. Within Infrastructure, Industrial holdings (toll roads and airports) performed the strongest while energy infrastructure trailed. On the Real Estate side, health care and industrial REITs were top contributors while residential REITs were the top detractors. Self-storage and cell towers were also notable detractors. Notable individual contributors for the period included Ventas, Granite REIT and Ferrovial. Notable detractors included Canadian Apartment Properties REIT, Killam Apartment REIT and Redeia. The portfolio increased its leverage over the period, deploying across both Infrastructure and Real Estate but with an emphasis on the latter. Within Real Estate, the portfolio added to Health Care and Net Lease companies while trimming Residential. The Infrastructure weight also rose modestly, primarily through holdings of Toll Roads and Airports.

The Fund's net asset value increased to \$239.5 million at December 31, 2025, from \$232.4 million at June 30, 2025. This change was composed of net sales of \$1.0 million, and investment performance of \$8.2 million and cash distributions of \$2.2 million. The investment performance of the Fund includes income and expenses which vary year over year. The Fund's income and expenses changed compared to the previous year mainly as a result of fluctuations in average net assets, portfolio activity and changes in the Fund's income earning investments.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the Manager from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The Manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

Recent Developments

There have been no recent developments that have affected, or are likely to materially affect the Fund.

Related Party Transactions

The Manager is a wholly-owned subsidiary of The Bank of Nova Scotia ("Scotiabank"). Scotiabank also owns, directly or indirectly, 100% of Scotia Securities Inc., a mutual fund dealer, and Scotia Capital Inc. (which includes ScotiaMcLeod and Scotia iTRADE), an investment dealer.

The Manager, on behalf of the Fund, may enter into transactions or arrangements with other members of Scotiabank or certain other companies that are related or connected to the Manager (each a "related party"). All transactions between the Fund and the related parties are in the normal course of business and are carried out at arm's length terms.

The purpose of this section is to provide a brief description of any transaction involving the Fund and a related party.

Management Fees

The Manager is responsible for the day-to-day management and operations of the Fund. Certain series of the Fund pay the Manager a management fee for its services as described in the "Management Fee" section later in this document. The management fee is an annualized rate based on the net asset value of each series of the Fund, accrued daily and calculated and paid monthly.

Fixed Administration Fees and Fund Costs

The Manager pays the operating expenses of the Fund, other than Fund Costs, in exchange for the payment by the Fund of a fixed rate administration fee (the "Fixed Administration Fee") to the Manager with respect to each series of the Fund. The expenses charged to the Fund in respect of the Fixed Administration Fee are disclosed in the Fund's financial statements. The Fixed Administration Fee is equal to a specified percentage of the net asset value of a series, calculated and paid in the same manner as the management fees for the Fund. Further details about the Fixed Administration Fee can be found in the Fund's most recent simplified prospectus.

In addition, each series of the Fund is responsible for its proportionate share of certain operating expenses ("Fund Costs"). Further details about Fund Costs can be found in the Fund's most recent simplified prospectus.

The Manager, at its sole discretion, may waive or absorb a portion of a series' expenses. These waivers or absorptions may be terminated at any time without notice.

Performance Fees

The Manager is entitled to an annual performance fee based on the performance of the Fund as compared to the performance of a benchmark, as described in the Fund's simplified prospectus. Performance fees are calculated on a calendar year basis.

Distribution Services

Certain registered dealers through which units of the Fund are distributed are related parties to the Fund and the Manager. The Manager may pay a trailing commission, which is negotiated with

dealers, to dealers for their financial advisors in respect of the assets of their clients invested in securities of the Fund. The Manager, during the period, could also pay trailing commissions to dealers for securities purchased or held through discount brokerage accounts.

Other Fees

The Manager, or its affiliates, may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as banking, brokerage, foreign exchange or derivatives transactions. The Manager, or its affiliates, may earn a foreign exchange spread when unitholders switch between series of funds denominated in different currencies.

Independent Review Committee

The Manager has established an independent review committee (the "IRC") in accordance with National Instrument 81-107 – Independent Review Committee for Investment Funds ("NI 81-107") with a mandate to review and provide recommendations or approval, as required, on conflict of interest matters referred to it by the Manager on behalf of the Fund. The IRC is responsible for overseeing the Manager's decisions in situations where the Manager is faced with any present or perceived conflicts of interest, all in accordance with NI 81-107.

The IRC may also approve certain mergers between the Fund and other funds, and any change of the auditor of the Fund. Subject to any corporate and securities law requirements, no securityholder approval will be obtained in such circumstances, but you will be sent a written notice at least 60 days before the effective date of any such transaction or change of auditor. In certain circumstances, securityholder approval may be required to approve certain mergers.

The IRC has four members, Stephen J. Griggs (Chair), Steven Donald, Heather A. T. Hunter and Cecilia Mo, each of whom is independent of the Manager.

The IRC prepares and files a report to the securityholders each fiscal year that describes the IRC and its activities for securityholders as well as contains a complete list of the standing instructions. These standing instructions enable the Manager to act in a particular conflict of interest matter on a continuing basis provided the Manager complies with its policies and procedures established to address that conflict of interest matter and reports periodically to the IRC on the matter. This report to the securityholders is available on the Manager's website or, at no cost, by contacting the Manager.

The compensation and other reasonable expenses of the IRC will be paid out of the assets of the Fund as well as out of the assets of the other investment funds for which the IRC may act as the independent review committee. Each member of the IRC receives an annual retainer of \$62,000 (\$77,000 for the Chair), plus expenses for each meeting. The fees and expenses, plus associated

legal costs, are split equally among all of the funds managed by the Manager for which the IRC acts as the independent review committee. The main component of compensation is an annual retainer fee. Expenses of the IRC may include premiums for insurance coverage, travel expenses and reasonable out-of-pocket expenses.

The Manager, in respect of the Fund, received the following standing instructions from the IRC with respect to related party transactions:

- Paying brokerage commissions and spreads to a related party for effecting security transactions on an agency and principal basis on behalf of the Fund;
- Purchases or sales of securities of an issuer from or to another investment fund managed by the Manager;
- Investments in the securities of issuers for which a related underwriter acted as an underwriter during the distribution of such securities and the 60-day period following the completion of such distribution;
- Executing foreign exchange transactions with a related party on behalf of the Fund;
- Purchases of securities of a related party;
- Entering into over-the-counter derivatives on behalf of the Fund with a related party;
- Outsourcing products and services to related parties which can be charged to the Fund;
- Acquisition of prohibited securities as defined by securities regulations;
- Trading in mortgages with a related party;
- Entering into a designated broker agreement with a related party; and
- Entering into a prime broker agreement with a related party.

The Manager is required to advise the IRC of any breach of a condition of the standing instructions. The standing instructions require, among other things, that the investment decision in respect to a related party transaction: (a) is made by the Manager free from any influence by an entity related to the Manager and without taking into account any consideration to any associate or affiliate of the Manager; (b) represents the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; and (c) is made in compliance with the Manager's written policies and procedures. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC to monitor compliance.

The Manager, in respect of the Fund, did not rely on IRC standing instructions regarding related party transactions during the period.

Financial Highlights

The following tables show selected key financial information about each series of the Fund and are intended to help you understand the Fund's financial performance for the periods indicated. The information on the following tables is based on prescribed regulations and as a result, is not expected to add across due to the increase (decrease) in net assets from operations being based on average units outstanding during the period and all other numbers being based on actual units outstanding at the relevant point in time. Footnotes for the tables are found at the end of the Financial Highlights section.

(1) This information is derived from the Fund's interim and audited annual financial statements. The net assets per unit presented in the financial statements may differ from the net asset value per unit. An explanation of these differences can be found in note 2 of the Fund's financial statements. The net asset value per unit at the end of the period is disclosed in Ratios and Supplemental Data. For Series FH, the information is presented in U.S. dollars. For all the other series, the information is expressed in Canadian dollars, which is the functional currency of the Fund.

(2) Net assets per unit and distributions per unit are based on the actual number of units outstanding for the relevant series at the relevant time. The increase (decrease) in net assets from operations per unit is based on the weighted average number of units outstanding for the relevant series over the period.

(3) Distributions were paid in cash or reinvested in additional units of the Fund.

* Annualized

(1) This information is provided as at the period end of the years shown.

(2) The management expense ratio is based on the total expenses (including sales tax, and excluding commissions and other portfolio transaction costs) of each series of the Fund and a proportional share of underlying funds' expenses (mutual funds, ETFs and closed-end funds), where applicable, for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs, short borrowing costs and interest on leverage of the Fund and the underlying funds, where applicable, expressed as an annualized percentage of daily average net asset value of the Fund during the period.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

The management fee is an annualized rate based on the net asset value of each series of the Fund, accrued daily and calculated and paid monthly. The management fees cover the costs of managing the Fund, arranging for investment analysis, recommendations and investment decision making for the Fund, arranging for distribution of the Fund, marketing and promotion of the Fund and providing or arranging for other services.

The breakdown of services received in consideration of management fees for each series, as a percentage of the management fees, are as follows:

	Management fees (%)	Dealer compensation (%)	Other [†] (%)
Series A	1.90	73.2	26.8
Series F	0.90	–	100.0
Series FH	0.90	–	100.0
Series FT	0.90	–	100.0
Series O*	n/a	–	–
Series T	1.90	70.4	29.6

* The management fee for this series is negotiated and paid directly by these unitholders and not by the Fund.

† Relates to all services provided by the Manager described above except dealer compensation.

Past Performance

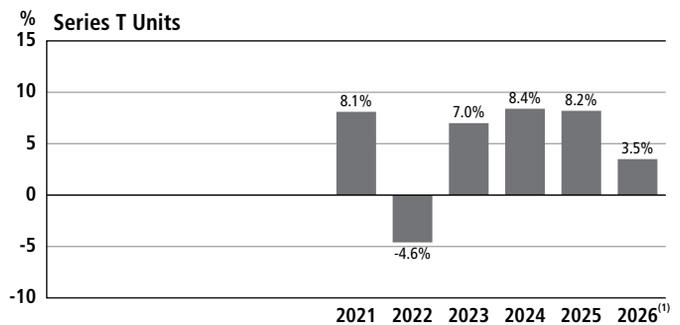

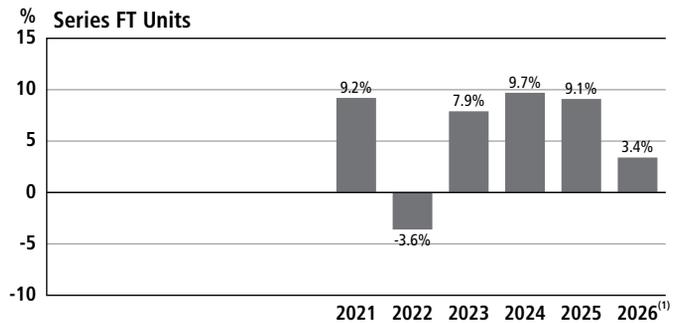

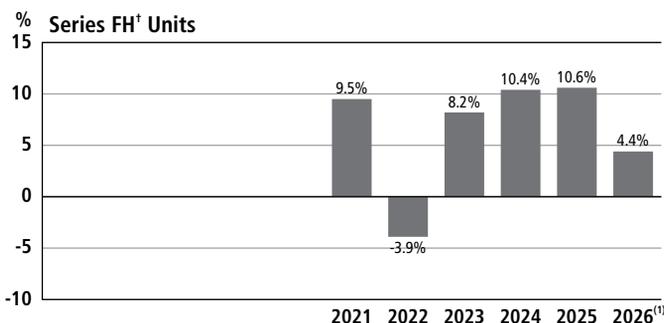

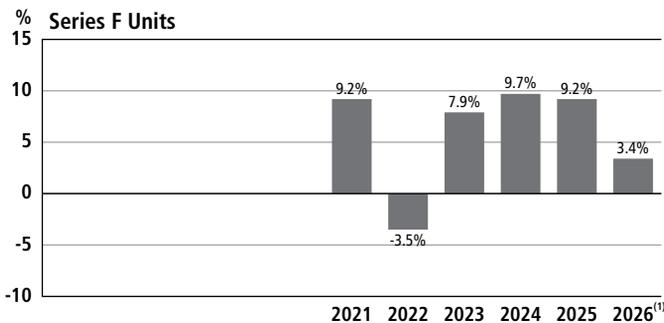

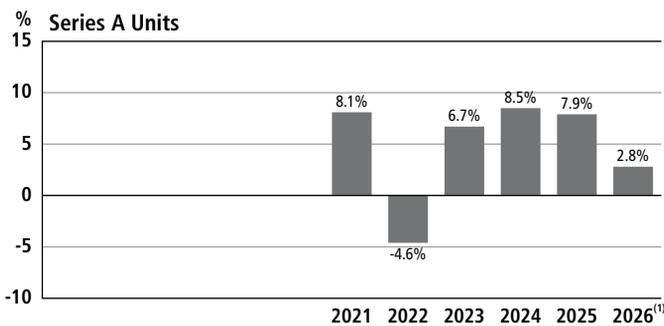

The following shows the past performance for each series and will not necessarily indicate how the Fund will perform in the future. The information shown assumes that all distributions made by each series of the Fund in the periods shown were reinvested in additional units of the relevant series. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

In accordance with National Instrument 81-106, past performance and annual return data is not disclosed for series that have been active for less than a year.

Year-by-Year Returns

The following charts show the performance for each series of the Fund and illustrate how performance has varied from year to year. The charts show, in percentage terms, how much an investment held on the first day of each fiscal year would have increased or decreased by the last day of each fiscal year for that series.

(for fiscal years ended June 30)

(1) Six-month period ended December 31, 2025.

† Performance for Series FH is calculated based on the net asset value per security in U.S. dollars.

Summary of Investment Portfolio

The Summary of Investment Portfolio may change due to ongoing portfolio transactions. A quarterly portfolio update is available to the investor at no cost by calling 1-800-268-8186, or by visiting www.dynamic.ca, 60 days after quarter end, except for June 30, which is the fiscal year end, when they are available after 90 days.

The Fund invests primarily in mutual funds managed by the Manager and/or third party investment managers. The simplified prospectus, annual information form and other information about the Underlying Funds are available on the Internet at www.sedarplus.ca.

By Asset Type	Percentage of net asset value
Alternative Credit Funds	44.9
Alternative Equity Funds	39.7
Alternative Fixed Income Funds	15.0
Other Net Assets (Liabilities)	0.7
Cash and Short Term Instruments (Bank Overdraft)	-0.3

By Country / Region ⁽¹⁾	Percentage of net asset value
Canada	99.6
Cash and Short Term Instruments (Bank Overdraft)	-0.3

Top Holdings*	Percentage of net asset value
Dynamic Credit Absolute Return Fund, Series "F"	44.9
Dynamic Short Term Credit PLUS Fund, Series "O"	15.0
