

## Dynamic Power American Growth Class

---

### Interim Management Report of Fund Performance

For the period ended December 31, 2025

This interim management report of fund performance contains financial highlights but does not contain either the interim financial statements or annual financial statements of the investment fund. You can get a copy of the interim financial statements or annual financial statements at your request, and at no cost, by calling toll-free 1-800-268-8186, by writing to us at 1832 Asset Management L.P., 40 Temperance Street, 16th Floor, Toronto, ON, M5H 0B4 or by visiting our website at [www.dynamic.ca](http://www.dynamic.ca) or SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

1832 Asset Management L.P. is the manager (the "Manager") of the Fund. In this document, "we", "us", "our" and the "Manager" refer to 1832 Asset Management L.P. and the "Fund" refers to Dynamic Power American Growth Class.

The term "net asset value" or "net asset value per share" in this document refers to the net asset value determined in accordance with Part 14 of National Instrument 81-106 – Investment Fund Continuous Disclosure ("National Instrument 81-106"); while the term "net assets" or "net assets per share" refers to total equity or net assets attributable to shareholders of the Fund as determined in accordance with IFRS Accounting Standards.

#### Caution Regarding Forward-Looking Statements

*Certain portions of this report, including, but not limited to, "Recent Developments", may contain forward-looking statements about the Fund and the underlying funds, as applicable, including statements with respect to strategies, risks, expected performance events and conditions. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "projects" and similar forward-looking expressions or negative versions thereof.*

*In addition, any statement that may be made concerning future performance, strategies or prospects and possible future action by the Fund is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future general economic, political and relevant market factors, such as interest rates, foreign exchange rates, equity and capital markets, and the general business environment, in each case assuming no changes to applicable tax or other laws or government regulation. Expectations and projections about future events are inherently subject to, among other things, risks and uncertainties, some of which may be unforeseeable.*

*Accordingly, current assumptions concerning future economic and other factors may prove to be incorrect at a future date.*

*Forward-looking statements are not guarantees of future performance and actual results or events could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, such as interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government relations, unexpected judicial or regulatory proceedings and catastrophic events. We stress that the above mentioned list of important factors is not exhaustive. Some of these risks, uncertainties and other factors are described in the Fund's simplified prospectus, under the heading "Risk Factors".*

*We encourage you to consider these and other factors carefully before making any investment decisions. Forward-looking statements should not be unduly relied upon. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next management report of fund performance, and that the forward-looking statements speak only to the date of this management report of fund performance.*

#### Results of Operations

For the six-month period ended at December 31, 2025 (the "period"), the Series A shares of the Fund generated a total return of 9.3%. Fund returns are reported net of all management fees and expenses for all series, unlike the returns of the Fund's benchmark, which is based on the performance of an index that does not pay fees or incur expenses. Returns for other series of the Fund will be similar to Series A with any difference in performance being primarily due to different management fees, operating expenses and other expenses that are applicable to that particular series. Please see the "Past Performance" section for the performance of the Fund's other series.

The Fund's broad-based benchmark, the S&P 500 Index (C\$) returned 11.9% during the same period. In accordance with National Instrument 81-106, we have included a comparison to this broad-based index to help you understand the Fund's performance relative to the general performance of the market.

The Fund underperformed the benchmark during the period due primarily to stock selection in the Industrials and Consumer Discretionary sectors. Stock selection and overweight exposure to the Information Technology sector was a key positive for relative performance. As of December 31, 2025, the two-year

annualized return for Series A units of the Fund was 26.6%, outperforming the S&P 500 Index (C\$) which returned 23.8%.

The U.S. equity market ended the 6-month period in positive territory as the S&P 500 Index (C\$) returned 11.9%. After a volatile first half of 2025, the second half can be characterized as a risk-on sentiment where the rally was broad based across most sectors.

The U.S. economy expanded at an annual rate 4.3% in the third quarter, the highest growth rate in two years, exceeding forecasts. Consumer spending grew at an annual rate of 3.5% in the third quarter, up from 2.5% in the prior quarter, driving economic growth.

Despite a resilient economy with strong GDP growth, the labor market struggled as the unemployment rate inched up to 4.4%, leading the U.S. Federal Reserve (Fed) to cut interest rates three times over the period from 4.50% to 3.75%, which is now at a three-year low. Fed Chair Jerome Powell said he was hopeful that the Fed's cuts would help support better hiring conditions. Though inflation has not hit the 2% Fed target rate it has stabilized and remains under 3%.

Ten of the 11 GICS (Global Industry Classification Standard) sectors posted positive returns over the six-month period. The best-performing sectors were Communication Services, Health Care and Information Technology. The worst performing sectors were Consumer Staples, Real Estate, and Materials.

The year began with investors still myopically concentrated in mega-cap technology leaders, but as 2025 progressed, investors soured on their massive free-cash flow collapse caused by AI spending. By year-end, only two of the seven "Mags" outperformed the market. The money leaving those names did not flow into mid-cap growth stocks as the Morningstar Mid-Cap Growth Index was only up 0.52% in Canadian dollars for 2025. The biggest winners in 2025 were traditional value stocks. The biggest detractor from total returns for Canadian investors was the nearly 5.5% decline the US dollar faced versus the Canadian dollar.

After the "Liberation Day" tariff announcements briefly but deeply hammered global markets, equities quickly rebounded to new highs within months. The second half of 2025 saw a striking rotation: banks and deep cyclicals such as energy, industrials, and materials dramatically outperformed at the expense of technology, communications, and consumer discretionary sectors. Even within technology, cyclical segments like disk drives and memory, experienced major rallies, reflecting investors' willingness to chase successive AI bottlenecks – from GPUs to memory and power. This was at the expense of other areas of technology. It was an impressive year for Nvidia up ~39% in 2025 but that was dwarfed by gains in Citigroup up ~66%, Intel up ~80% and Caterpillar up ~58%.

As we enter 2026, broad macro data indicates that a "normal" economic expansion remains firmly intact, with major risks to that trajectory having declined over the past year, though geopolitics always remains a wild card. Several themes, driven from our bottom up analysis, guide our positioning for the next number of years: the continued expansion of AI to the edge and application layer, as the days of merely training models on the history of the internet

end and the next phase of investment focuses on enterprise data and agentic AI systems embedding intelligence directly into workflows; the strengthening of small and mid-sized businesses, set to benefit from new tax reductions, regulatory easing, and improved credit conditions, especially under a pro-business policy environment, with companies enabling SMB productivity through marketing software and AI automation well positioned as the world moves from a search economy to an answers economy and more breakthroughs in biotechnology. Finally, we expect a re-acceleration in M&A and some large, anticipated IPO activity in what will be a supportive regulatory backdrop and healthy equity markets, with many companies in our portfolios standing to benefit directly from this resurgence, either as strategic targets or acquirers.

The market continues to violently rotate from bottleneck to bottleneck in the "picks, shovels and power" phase of AI – from concentrating on Nvidia in 2023 and early 2024 to 2025 where sectors like disk drives and memory that had not grown revenues in a decade, went up 200-500% in 2025. We believe that many of the big winners of AI have yet to emerge.

Much like the era of the personal computer, the internet, mobility and the cloud, AI is a technology platform shift. Platform shifts in technology matter for investors because they redefine who creates and captures value, reshaping profit pools, market shares, and long-term winners and losers.

At the end of the period, the Fund was comprised of five of the eleven sectors of the S&P 500 Index. Information Technology was the highest weighted sector at approximately 62%.

As of December 31, 2025, the Fund did not own any Industrials sector stocks. Axon Enterprise Inc. was the second biggest stock detractor from performance, after being the third best contributor to Fund performance for the twelve months ended June 30, 2025. It was also held by the benchmark, and the return of the stock in the Fund was better than the return for the benchmark, however, the very small weighting of the stock in the benchmark meant it was not a notable detractor from benchmark performance. Two of the Consumer Discretionary stocks held by the Fund were among its top ten stock detractors from performance, and one we not held by the benchmark. There were no stocks from the sector that were notable detractors from benchmark performance.

Similar to many reporting periods, Information Technology was the Fund's biggest contributor to both absolute and relative performance. Led by Lumentum Holdings Inc., there were five Information Technology stocks among the Fund's top ten stock contributors to performance. Also, the Fund did not own two of the four stocks that were among the biggest detractors from benchmark performance.

Notable sector changes during the past six months were an increase in the Fund's Information Technology and Health Care weightings, and a decrease in the Financials and Industrials weightings. At period end, all Industrials companies had been exited. Sector weights in our portfolios are derived strictly from our bottom-up stock selection process.

We employ a disciplined, repeatable and proven investment process that focuses on a bottom-up stock selection approach.

This process leads us to building concentrated portfolios of 20–25 companies. Our investment process begins by screening the universe of all publicly listed companies to seek out those with high revenue growth, high earnings growth and the ability to become significantly larger companies over time. Companies included in benchmarks are there solely due to capitalization size and not due to any fundamental or qualitative factors. We are active stock pickers. The universe of stocks available for inclusion in our portfolios is limited to those that meet our investment criteria, not to those contained in the benchmark. We do not concern ourselves with what companies are held in the benchmark and as a result, our portfolios are very different from their benchmarks. It is our job to beat the index over time, not be the index.

The Fund's net asset value decreased to \$786.1 million at December 31, 2025, from \$803.9 million at June 30, 2025. This change was composed of net redemptions of \$94.8 million, and investment performance of \$78.1 million and cash distributions of \$1.1 million. The investment performance of the Fund includes income and expenses which vary year over year. The Fund's income and expenses changed compared to the previous year mainly as a result of fluctuations in average net assets, portfolio activity and changes in the Fund's income earning investments.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the Manager from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The Manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

## Recent Developments

There have been no recent developments that have affected, or are likely to materially affect the Fund.

## Related Party Transactions

The Manager is a wholly-owned subsidiary of The Bank of Nova Scotia ("Scotiabank"). Scotiabank also owns, directly or indirectly, 100% of Scotia Securities Inc., a mutual fund dealer, and Scotia Capital Inc. (which includes ScotiaMcLeod and Scotia iTRADE), an investment dealer.

The Manager, on behalf of the Fund, may enter into transactions or arrangements with other members of Scotiabank or certain other companies that are related or connected to the Manager (each a "related party"). All transactions between the Fund and the related parties are in the normal course of business and are carried out at arm's length terms.

The purpose of this section is to provide a brief description of any transaction involving the Fund and a related party.

## Management Fees

The Manager is responsible for the day-to-day management and operations of the Fund. Certain series of the Fund pay the Manager

a management fee for its services as described in the "Management Fee" section later in this document. The management fee is an annualized rate based on the net asset value of each series of the Fund, accrued daily and calculated and paid monthly.

## Fixed Administration Fees and Fund Costs

The Manager pays the operating expenses of the Fund, other than Fund Costs, in exchange for the payment by the Fund of a fixed rate administration fee (the "Fixed Administration Fee") to the Manager with respect to each series of the Fund. The expenses charged to the Fund in respect of the Fixed Administration Fee are disclosed in the Fund's financial statements. The Fixed Administration Fee is equal to a specified percentage of the net asset value of a series, calculated and paid in the same manner as the management fees for the Fund. Further details about the Fixed Administration Fee can be found in the Fund's most recent simplified prospectus.

In addition, each series of the Fund is responsible for its proportionate share of certain operating expenses ("Fund Costs"). Further details about Fund Costs can be found in the Fund's most recent simplified prospectus.

The Manager, at its sole discretion, may waive or absorb a portion of a series' expenses. These waivers or absorptions may be terminated at any time without notice.

## Related Brokerage Commissions

From time to time, the Fund may enter into portfolio securities transactions with Scotia Capital Inc. or other related dealers in whom Scotiabank has a significant interest (a "Related Broker"). These Related Brokers may earn commission or spreads on such transactions, which are made on terms and conditions that are comparable to transactions made with non-related brokers.

During the period, the Fund paid \$4,000 in commissions to Related Brokers.

## Performance Fees

The Manager is entitled to an annual performance fee based on the performance of the Fund as compared to the performance of a benchmark, as described in the Fund's simplified prospectus. Performance fees are calculated on a calendar year basis.

## Distribution Services

Certain registered dealers through which shares of the Fund are distributed are related parties to the Fund and the Manager. The Manager may pay a trailing commission, which is negotiated with dealers, to dealers for their financial advisors in respect of the assets of their clients invested in securities of the Fund. The Manager, during the period, could also pay trailing commissions to dealers for securities purchased or held through discount brokerage accounts.

## Other Fees

The Manager, or its affiliates, may earn fees and spreads in connection with various services provided to, or transactions with,

the Fund, such as banking, brokerage, foreign exchange or derivatives transactions. The Manager, or its affiliates, may earn a foreign exchange spread when shareholders switch between series of funds denominated in different currencies.

### **Independent Review Committee**

The Manager has established an independent review committee (the "IRC") in accordance with National Instrument 81-107 – Independent Review Committee for Investment Funds ("NI 81-107") with a mandate to review and provide recommendations or approval, as required, on conflict of interest matters referred to it by the Manager on behalf of the Fund. The IRC is responsible for overseeing the Manager's decisions in situations where the Manager is faced with any present or perceived conflicts of interest, all in accordance with NI 81-107.

The IRC may also approve certain mergers between the Fund and other funds, and any change of the auditor of the Fund. Subject to any corporate and securities law requirements, no securityholder approval will be obtained in such circumstances, but you will be sent a written notice at least 60 days before the effective date of any such transaction or change of auditor. In certain circumstances, securityholder approval may be required to approve certain mergers.

The IRC has four members, Stephen J. Griggs (Chair), Steven Donald, Heather A. T. Hunter and Cecilia Mo, each of whom is independent of the Manager.

The IRC prepares and files a report to the securityholders each fiscal year that describes the IRC and its activities for securityholders as well as contains a complete list of the standing instructions. These standing instructions enable the Manager to act in a particular conflict of interest matter on a continuing basis provided the Manager complies with its policies and procedures established to address that conflict of interest matter and reports periodically to the IRC on the matter. This report to the securityholders is available on the Manager's website or, at no cost, by contacting the Manager.

The compensation and other reasonable expenses of the IRC will be paid out of the assets of the Fund as well as out of the assets of the other investment funds for which the IRC may act as the independent review committee. Each member of the IRC receives an annual retainer of \$62,000 (\$77,000 for the Chair), plus expenses for each meeting. The fees and expenses, plus associated legal costs, are split equally among all of the funds managed by the Manager for which the IRC acts as the independent review committee. The main component of compensation is an annual retainer fee. Expenses of the IRC may include premiums

### **Financial Highlights**

The following tables show selected key financial information about each series of the Fund and are intended to help you understand the Fund's financial performance for the periods indicated. The information on the following tables is based on prescribed regulations and as a result, is not expected to add across due to the increase (decrease) in net assets from operations being based on average shares outstanding during the period and all other numbers being based on actual shares outstanding at the relevant point in time. Footnotes for the tables are found at the end of the Financial Highlights section.

for insurance coverage, travel expenses and reasonable out-of-pocket expenses.

The Manager, in respect of the Fund, received the following standing instructions from the IRC with respect to related party transactions:

- Paying brokerage commissions and spreads to a related party for effecting security transactions on an agency and principal basis on behalf of the Fund;
- Purchases or sales of securities of an issuer from or to another investment fund managed by the Manager;
- Investments in the securities of issuers for which a related underwriter acted as an underwriter during the distribution of such securities and the 60-day period following the completion of such distribution;
- Executing foreign exchange transactions with a related party on behalf of the Fund;
- Purchases of securities of a related party;
- Entering into over-the-counter derivatives on behalf of the Fund with a related party;
- Outsourcing products and services to related parties which can be charged to the Fund;
- Acquisition of prohibited securities as defined by securities regulations;
- Trading in mortgages with a related party;
- Entering into a designated broker agreement with a related party; and
- Entering into a prime broker agreement with a related party.

The Manager is required to advise the IRC of any breach of a condition of the standing instructions. The standing instructions require, among other things, that the investment decision in respect to a related party transaction: (a) is made by the Manager free from any influence by an entity related to the Manager and without taking into account any consideration to any associate or affiliate of the Manager; (b) represents the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; and (c) is made in compliance with the Manager's written policies and procedures. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC to monitor compliance.

The Manager, in respect of the Fund, did not rely on IRC standing instructions regarding related party transactions during the period.

(1) This information is derived from the Fund's interim and audited annual financial statements. The net assets per share presented in the financial statements may differ from the net asset value per share. An explanation of these differences can be found in note 2 of the Fund's financial statements. The net asset value per share at the end of the period is disclosed in Ratios and Supplemental Data.

(2) Net assets per share and distributions per share are based on the actual number of shares outstanding for the relevant series at the relevant time. The increase (decrease) in net assets from operations per share is based on the weighted average number of shares outstanding for the relevant series over the period.

(3) Distributions were paid in cash or reinvested in additional shares of the Fund.

\* Annualized

(1) This information is provided as at the period end of the years shown.

(2) The management expense ratio is based on the total expenses (including sales tax, and excluding commissions and other portfolio transaction costs) of each series of the Fund and a proportional share of underlying funds' expenses (mutual funds, ETFs and closed-end funds), where applicable, for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs, short borrowing costs and interest on leverage of the Fund and the underlying funds, where applicable, expressed as an annualized percentage of daily average net asset value of the Fund during the period.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

**Management Fees**

The management fee is an annualized rate based on the net asset value of each series of the Fund, accrued daily and calculated and paid monthly. The management fees cover the costs of managing the Fund, arranging for investment analysis, recommendations and investment decision making for the Fund, arranging for distribution of the Fund, marketing and promotion of the Fund and providing or arranging for other services.

The breakdown of services received in consideration of management fees for each series, as a percentage of the management fees, are as follows:

	Management fees (%)	Dealer compensation (%)	Other <sup>†</sup> (%)
Series A	2.00	47.0	53.0
Series F	1.00	–	100.0
Series FT	1.00	–	100.0
Series IP*	n/a	–	–
Series T	2.00	48.7	51.3

\* The management fee for this series is negotiated and paid directly by these shareholders and not by the Fund.

† Relates to all services provided by the Manager described above except dealer compensation.

**Past Performance**

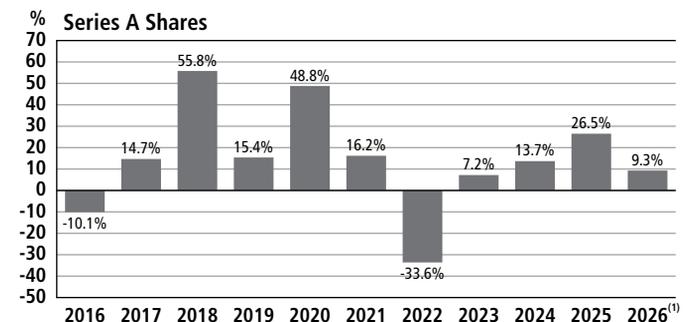

The following shows the past performance for each series and will not necessarily indicate how the Fund will perform in the future. The information shown assumes that all distributions made by each series of the Fund in the periods shown were

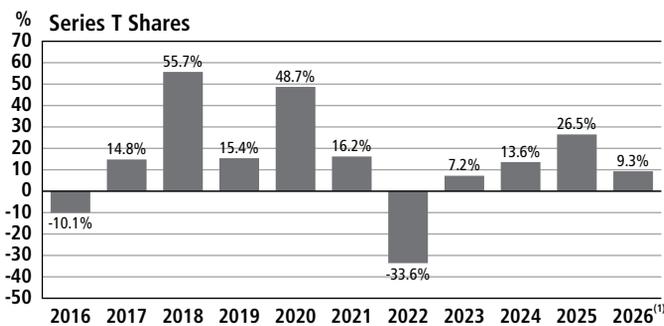

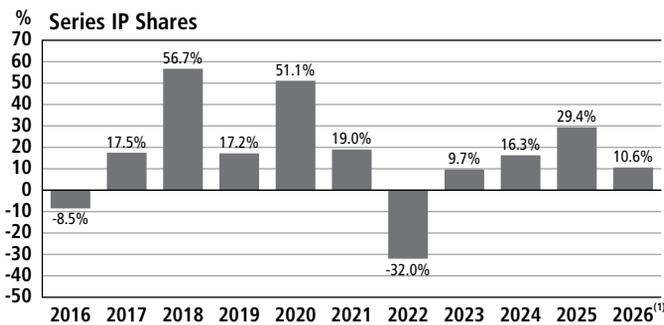

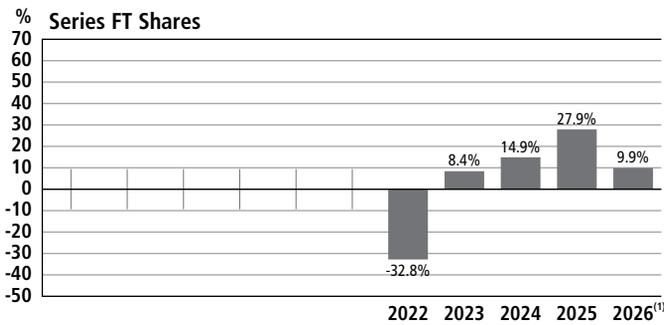

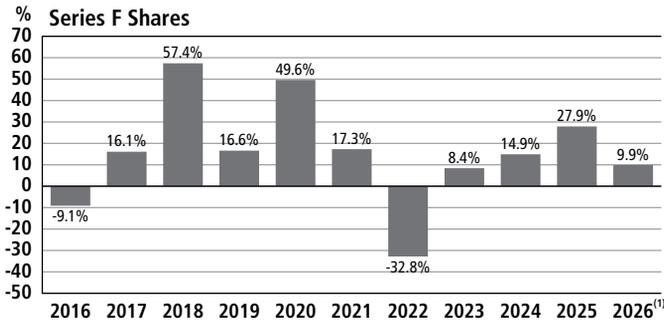

reinvested in additional shares of the relevant series. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

**Year-by-Year Returns**

The following charts show the performance for each series of the Fund and illustrate how performance has varied from year to year. The charts show, in percentage terms, how much an investment held on the first day of each fiscal year would have increased or decreased by the last day of each fiscal year for that series.

(for fiscal years ended June 30)

By Country / Region <sup>(1)</sup>	Percentage of net asset value
United States	95.8
Cash and Short Term Instruments (Bank Overdraft)	4.3

By Industry <sup>(1)(2)</sup>	Percentage of net asset value
Information Technology	69.2
Health Care	9.4
Consumer Discretionary	7.7
Communication Services	7.4
Cash and Short Term Instruments (Bank Overdraft)	4.3
Financials	2.1

Top 25 Holdings	Percentage of net asset value
MongoDB, Inc.	7.1
